Uruhushya Academy

Project Description

1. Introduction

Rwanda is reforming the way driving licences are obtained. Under the new regulations introduced by the Rwanda National Police (RNP), starting September 2026, every candidate must present a certificate from a driving school confirming that they completed the required road-law training *before* they are allowed to sit the official theory test at an accredited RNP test centre.

This reform was introduced to fight fake certificates and to raise the quality of driver training. However, it introduced a new problem: because the certificate can only be obtained by sitting in a physical classroom for a fixed period (often three months), it is effectively impossible for people who work long or irregular hours — such as truck drivers, nurses, security guards and market workers — to obtain the required road-law training.

Uruhushya Academy is an online learning platform that delivers the exact road-law curriculum required by the RNP, but from any device, at any time. It makes self-study verifiable and trustworthy using a system of identity-verified checkpoints, continuous assessment and a nationally accepted certificate — so that a worker can study at 2 a.m. after their shift, and still receive a certificate that the RNP will accept on exam day.

2. Problem Statement

Two problems exist side by side in Rwanda's driver licensing system:

1. **Fake certificates.** There is no reliable, centralised way to verify that a person actually completed road-law training. This is what the September 2026 reform tries to solve by requiring school certificates.

2. **The "classroom only" requirement excludes working people.** The reform ties the proof of training to physical classroom attendance. People who work 24/7-style schedules cannot attend fixed classroom sessions, so they either cannot get a licence at all or are forced to buy a fraudulent certificate — recreating the exact problem the reform was meant to solve.

The reform conflates *attendance* with *learning*. A person can sit in a classroom for three months and learn nothing; a person can study alone, consistently, with verifiable progress, and learn everything. The system currently has no way to recognise the second kind of learner.

---

3. Project Description

Uruhushya Academy is a web-based e-learning system for the road-law (theory) part of driver training in Rwanda. It is accessed through a browser on a computer, tablet or mobile phone, and is designed for learners who cannot attend a physical classroom because of work, distance or family obligations.

The system is divided into six functional modules:

Module	What it does
1. Registration & Identity	The learner creates an account using their national ID number and a liveness (photo) check, so the account belongs to the real person.
2. Lessons	The road-law course content — traffic signs, road rules, signals, penalties — organised in lessons that match the RNP theory test syllabus.
3. Assessment	Randomized quizzes after every lesson. A quiz must be passed to unlock the next lesson (blocking checkpoint).
4. Spaced Repetition	Questions previously answered return days later, forcing long-term memory instead of short-term cramming.
5. Verification Check-ins	Random live check-ins by an instructor (voice or video question confirmed against the learner's photo), so cheating is always risky.
6. Certificate & Verification	On completion, the school issues a certificate with a unique serial number. Anyone — including RNP officers at the test centre — can verify it online on the platform.

3.1 Instructor Qualification Requirements

The September 2026 reform was written for the **physical classroom**: it requires road-law lessons to be *taught by certified instructors* in a school environment. Uruhushya Academy keeps that requirement intact — it only changes the *room*, not the teacher:

- **Certified road-law instructors.** Every instructor who prepares, reviews or teaches the road-law content on the platform must meet the RNP/ANPAER requirement: at minimum **secondary school + a diploma + a teaching certificate**, specialised in **road law**.
- **Employed by a licensed school.** Instructors on the platform are staff of the ANPAER-accredited partner school, exactly as in the physical classroom.
- **Named on certificates.** Each learner's certificate records which certified instructor delivered and verified their training, so RNP can trace every certificate back to a qualified teacher.
- **Qualification records kept by the system.** The platform stores each instructor's diploma, teaching certificate and ANPAER/RNP registration, and only certified instructors are allowed to perform check-ins or issue the

confirmation required for a certificate.

This is how the platform answers the reform's core question — *who teaches these lessons?* — with the same answer a classroom gives: **a certified, registered road-law instructor at a licensed school.**

Workflow of the system:

1. The learner registers and is identity-verified.
2. The learner studies lessons at their own pace, at any hour.
3. Quizzes and spaced-repetition questions track genuine progress.
4. When the course is complete, the partner driving school's officer confirms the learner's identity once more.
5. The school issues the numbered certificate.
6. The learner presents the certificate (with its serial number) when applying for the official RNP theory test — exactly as the regulations require, and the RNP officer can verify it online.

The system therefore does not replace the RNP theory test: it replaces the *classroom requirement* that currently blocks working people, while keeping the verification that the reform wanted.

---

4. Project Idea

Uruhushya Academy is a web platform that offers the nationally approved road-law course in a fully online, self-paced format, with verification built into the learning process itself:

- **Identity-verified account creation** (national ID number + liveness check), so the person being trained is the person named on the account.
- **Structured, nationally approved road-law lessons** matching the RNP theory test syllabus (traffic signs, road rules, signals, penalties).
- **Continuous assessment** — randomized quizzes after each lesson that must be passed to unlock the next stage (blocking checkpoints).
- **Spaced repetition** — questions reappear on later days so recalling the answer months later is required, not just cramming.
- **Random live verification check-ins** — a supervisor or the system asks the learner an identity-verified question at random moments, so cheating is never safe, because it could always be caught.
- **A verifiable completion certificate** with a unique serial number that the RNP test-centre officer can check online, proving the learner completed the required training.

The platform works with the existing legal framework rather than against it: certificates are issued through a partnership with an ANPAER-accredited driving school, under that school's licence, in full compliance with the RNP rules.

---

5. Objectives

5.1 Overall Objective

To build a platform that makes Rwandan road-law training accessible to all workers while making the resulting certificate more trustworthy than a classroom attendance paper.

5.2 Specific Objectives

1. To analyse the current RNP / ANPAER road-law training and certification requirements.
2. To design a self-paced online learning model whose completion cannot reasonably be faked.
3. To develop a web platform implementing that model (lessons, quizzes, spaced repetition, identity verification, certificate generation).
4. To integrate the platform with the certificate requirements of the RNP theory test application process.
5. To test and evaluate the platform with real learners.

---

6. Stakeholders

Stakeholder	Role in the system
Learner (student)	Studies the road-law course online and obtains the certificate.
RNP (Rwanda National Police)	Officially recognised authority that sets the theory test and accepts training certificates.
ANPAER	The association that licenses and monitors driving schools.
Partner driving school	An ANPAER-accredited school that issues the certificate under its licence.
Instructor / Trainer	Prepares materials, reviews progress, and performs random live check-ins.
Examiner (RNP test centre)	Verifies the learner's certificate before allowing the theory test.
Platform administrator	Manages users, certificates, and system integrity.

> Note: In the assignment, "student" is used in two senses. To avoid confusion: (1) **learners** are the people training to drive, and (2) the *project students* are the authors of this proposal.

---

7. Scope

7.1 In Scope

- Online registration and identity verification for learners.
- The road-law course content structured by the official syllabus.
- Quizzes, blocking checkpoints, and spaced repetition.
- Certificate generation with a verifiable serial number.
- A certificate verification page for RNP officers and employers.
- A dashboard for the partner driving school to monitor learners.
- An administration panel for platform management.

7.2 Out of Scope (for this version)

- The RNP theory test itself (this is conducted by the RNP at accredited test centres and is outside the platform).

- Practical (behind-the-wheel) driving training.
- Theoretical test results management for other schools.
- Direct ANPAER / RNP accreditation of the platform (targeted later; the first version works through a partner school).

---

8. Expected Benefits

- **For 24/7 workers:** the ability to complete the required road-law training legally, from a phone, at any hour, without losing work time.
- **For road safety:** verifiable learning, meaning fewer "certificate buyers" who actually know nothing about road law.
- **For driving schools:** a new channel to enrol and serve more learners at lower cost, and digital records instead of paper.
- **For RNP / ANPAER:** a transparent, auditable trail of who trained, when, and with what progress — far easier to trust than a paper certificate.

---

9. Feasibility Summary

- **Technical:** Feasible. The platform uses widely available web technologies (Python, Django/FastAPI, PostgreSQL, mobile-friendly frontend) that can be hosted in Rwanda.
- **Economic:** Feasible. The cost is a one-time build plus hosting; revenue comes from course fees paid by learners. It is cheaper than classroom training for both school and learner.
- **Legal:** Feasible *through partnership*. Full compliance is achieved by issuing certificates via an ANPAER-accredited partner school, in line with the September 2026 reform.
- **Social:** Highly feasible. The demand is proven: workers currently can only choose between losing work time to sit in class or buying fake certificates. The platform removes that forced choice.

---

10. Project Structure

This project is delivered as the following documents:

1. **Project Description** (this document)
2. Requirements Specification
3. Use Case Diagrams & Descriptions
4. System Design (architecture, ERD, data model)
5. Technology Stack Justification
6. Development Plan & Timeline
7. Risk Analysis & Accreditation Strategy
8. Glossary & References

These documents together form the full study assignment.

Uruhushya Academy

Requirements Specification

---

1. Introduction

This document defines the complete set of requirements for the **Uruhushya Academy** platform. It describes what the system must do (functional requirements) and how it must behave (non-functional requirements). Each requirement has a unique identifier so it can be traced through design, implementation and testing.

Requirements are marked with a priority:

- **M (Must)** — essential; the system is not acceptable without it.
- **S (Should)** — important but workarounds exist.
- **C (Could)** — desirable if time and budget allow.

---

2. Actors of the System

Actor	Description
Learner	A person over 18 who registers to study road law.
Instructor	A certified road-law trainer who prepares content and performs verification check-ins.
School Officer	Staff of the ANPAER-accredited partner school who issue certificates.
RNP Officer	National Police examiner who verifies a certificate before the theory test.
Administrator	Platform manager who administers users, roles and settings.

Actor	Description
Visitor	Unregistered person who views public information only.

---

3. Functional Requirements

3.1 Registration and Identity (Module 1)

ID	Requirement	Priority
FR-01	The system shall allow a visitor to create a learner account using their national ID number.	M
FR-02	The system shall validate the national ID number format and uniqueness.	M
FR-03	The system shall capture a photo of the learner (liveness check) during registration.	M
FR-04	The system shall require the learner to verify their phone number by SMS code.	M
FR-05	The system shall allow a learner to log in with phone number and password.	M
FR-06	The system shall support password recovery via SMS or email.	M
FR-07	The system shall prevent registration by a person already active on the platform.	S

3.2 Lessons (Module 2)

ID	Requirement	Priority
FR-08	The system shall display lessons organised by topic (traffic signs, rules, signals, penalties).	M
FR-09	The system shall present lessons in the three RNP test languages: Kinyarwanda, English, French.	M

ID	Requirement	Priority
FR-10	The system shall only unlock Lesson N+1 after Lesson N is completed.	M
FR-11	Lessons shall be viewable on phone, tablet and desktop browsers.	M
FR-12	The system shall record the learner's progress through every lesson.	M

3.3 Assessment and Spaced Repetition (Modules 3–4)

ID	Requirement	Priority
FR-13	The system shall provide a randomized quiz after each lesson.	M
FR-14	A quiz question bank of at least 500 questions shall exist.	M
FR-15	The system shall require a passing score (e.g. 60%) to unlock the next lesson.	M
FR-16	The system shall allow a learner to retake a failed quiz after a defined delay.	M
FR-17	The system shall re-ask correctly answered questions after a growing gap (spaced repetition).	M
FR-18	The system shall track and display the learner's accuracy per topic.	S
FR-19	The system shall prevent an exam paper from being identical on consecutive attempts.	M

3.4 Verification Check-ins (Module 5)

ID	Requirement	Priority
FR-20	The system shall schedule random verification check-ins during a learner's course.	M
FR-21	A check-in shall require the learner to confirm identity via a photo prompt and/or an instructor call.	M

ID	Requirement	Priority
FR-22	The system shall record the result of every check-in (passed / failed / missed).	M
FR-23	The system shall warn the learner if a check-in is missed or failed.	S
FR-24	Repeated failed check-ins shall suspend the learner's course pending review.	S

3.5 Certificate and Verification (Module 6)

ID	Requirement	Priority
FR-25	On course completion, the School Officer shall be able to issue a certificate.	M
FR-26	Each certificate shall have a unique serial number.	M
FR-27	The certificate shall show the learner's name, ID number, course, dates and serial number.	M
FR-28	The certificate PDF shall include a scanning QR code linking to its verification page.	M
FR-29	A verification page shall allow anyone to check a serial number and see if the certificate is valid.	M
FR-30	The verification page shall not reveal sensitive data (e.g. full phone number).	M
FR-31	The system shall prevent a certificate from being issued to a learner who failed check-ins.	M

3.6 Roles and Administration

ID	Requirement	Priority
FR-32	The system shall provide separate dashboards for Learner, Instructor, School Officer, RNP Officer and Administrator.	M
FR-33	The Administrator shall be able to create, deactivate and manage user accounts.	M
FR-34	The School Officer shall be able to view, approve and issue certificates.	M
FR-35	The RNP Officer shall have read-only access to certificate verification.	M
FR-36	The system shall keep an audit log of all administrative actions.	S
FR-37	The system shall allow staff to export learner reports (e.g. CSV).	C

3.7 Payment (optional for V1)

ID	Requirement	Priority
FR-38	The system shall allow a learner to pay for course access (MTN MoMo / Airtel Money / card).	S
FR-39	The system shall record payment status and issue receipts from Irembo-compatible billing numbers where applicable.	C

3.8 Public Pages

ID	Requirement	Priority
FR-40	The system shall display a public homepage describing the course and its legitimacy.	M
FR-41	The system shall display the partner school's ANPAER accreditation number.	M

ID	Requirement	Priority
FR-42	The system shall display the course price and steps to obtain the RNP theory test.	S

3.9 Instructor Qualification (Regulatory Compliance)

The September 2026 reform tied the certificate's validity to the person who teaches the lessons. The platform enforces the same rule as the physical classroom:

ID	Requirement	Priority
FR-43	The system shall store, for every instructor, proof of minimum qualification: secondary school certificate, diploma, and teaching certificate.	M
FR-44	The system shall record the instructor's road-law specialisation and ANPAER/RNP registration number.	M
FR-45	An instructor shall only be marked "certified and active" when all required qualification documents are uploaded, valid and approved.	M
FR-46	Only certified and active instructors shall be able to perform verification check-ins or authorise a certificate.	M
FR-47	The system shall record which instructor delivered each learner's course and print that instructor's name on the certificate.	M
FR-48	The system shall alert the School Officer when an instructor's qualification document is expiring or missing.	S
FR-49	The Administrator shall be able to view, approve and reject instructor qualification documents.	M

> **Rationale.** The reform did not ban online teaching; it banned *uncertified* teaching. By requiring certified road-law instructors (the same qualification as a classroom teacher), the platform satisfies the reform while changing only the delivery room.

---

4. Non-Functional Requirements

ID	Requirement	Priority
NFR-01	**Availability:** the system shall be operational at least 99% of the time during business hours.	M
NFR-02	**Performance:** pages shall load in under 3 seconds on a 3G connection.	M
NFR-03	**Security:** passwords shall be stored hashed; all sensitive data encrypted in transit (HTTPS).	M
NFR-04	**Security:** identity data shall be stored and shared in line with Rwanda's data protection law (Law No. 058/2021).	M
NFR-05	**Privacy:** learner data shall not be visible to other learners.	M
NFR-06	**Usability:** the interface shall be simple enough for a user with a basic smartphone.	M
NFR-07	**Compatibility:** the system shall work on Android 5+ and iOS 11+ mobile browsers.	S
NFR-08	**Scalability:** the system shall support at least 5,000 concurrent learners.	S
NFR-09	**Integrity:** quiz results and certificates shall be tamper-evident (verified by serial + signature).	M
NFR-10	**Auditability:** all check-in and certificate events shall be logged with timestamps.	M
NFR-11	**Maintainability:** code shall be modular with clear separation of frontend and backend.	S
NFR-12	**Accessibility:** basic contrast and font-size support for visually impaired users.	C

5. Data Requirements Summary

The system stores data about:

- **Learners** (name, ID number, phone, password hash, photo, language).
- **Instructors** (name, ID, diplomas, teaching certificate, road-law specialisation, ANPAER/RNP registration number, qualification document files, approval status).
- **Lessons** (title, topic, content, language, order).
- **Questions and answers** (text, options, correct answers, topic, difficulty).
- **Attempts** (learner, quiz, answers, score, timestamp).
- **Check-ins** (learner, type, status, timestamp).
- **Certificates** (serial number, learner, issue date, expiry, status).
- **Payments** (learner, amount, method, reference, status).
- **Audit log** (actor, action, target, timestamp).

---

6. Constraints and Assumptions

- The platform does **not** replace the RNP theory test; the theory test remains managed by RNP at accredited centres.
- The certificate is issued by the *partner school* (ANPAER-accredited), not by the platform itself.
- All content and check-ins are delivered by **certified road-law instructors** (secondary + diploma + teaching certificate) employed by the partner school — the same standard as the physical classroom.
- Course content must follow the approved national road-law syllabus used by RNP.
- The first version assumes the partner school already holds a valid ANPAER licence.

---

7. Acceptance Criteria (Summary)

The system will be considered accepted when:

1. A learner can register with ID + liveness check and complete the course from a phone.
2. Lessons, quizzes, and spaced-repetition blocking checkpoint behaviour all work as specified.
3. A certificate can be issued with a unique serial and verified on the public page.
4. All M-priority functional and non-functional requirements pass their tests.

---

8. Requirements Traceability

Every FR/NFR will be mapped in the test plan to:

- its use case (Document 3),
- its design component (Document 4),
- its test case (test plan produced during implementation).

This guarantees that nothing described here is lost during development.

Use Case Diagrams & Descriptions (UML)

---

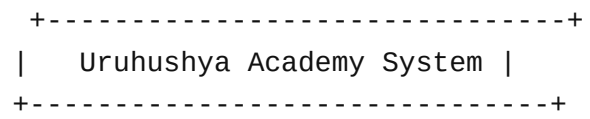

1. Introduction

This document describes the interactions between actors and the system using UML use cases. Each use case is described in the standard format so the diagrams can be reproduced in any UML tool (e.g. StarUML, PlantUML, draw.io, Visual Paradigm).

---

2. Main Use Case Diagram (textual)

The main actors and their use cases:

LEARNER - Register (with national ID + liveness check) - Verify phone number by SMS - Log in / recover password - Study lessons - Take lesson quiz - Repeat quiz after failing - Complete spaced-repetition questions - Answer a verification check-in - View own progress - Pay for course access - Download certificate - Verify own certificate

INSTRUCTOR - Manage lesson content - Manage question bank - Perform verification check-ins (call / photo review) - View learner progress reports - Upload / update own qualification documents (diploma, teaching certificate, ANPAER/RNP registration) - Verify own certified status

SCHOOL OFFICER - Review check-in results - Issue certificate - Revoke certificate - Export reports

RNP OFFICER - Verify a certificate (read-only) - View audit trail of a certificate

ADMINISTRATOR - Manage user accounts and roles - Manage system settings - View audit logs - Manage payment records

VISITOR - View public homepage - Check an RNP theory-test guidance page

---

3. Use Case Relationships (UML notation summary)

Relationship	Example
include	"Take lesson quiz" includes "Verify learner is logged in".
include	"Issue certificate" includes "Review check-in results" and "Validate course completion".
extend	"Repeat quiz after failing" extends "Take lesson quiz".
extend	"Recover password" extends "Log in".
generalization	School Officer and RNP Officer are types of a general "Staff" actor.

---

4. Detailed Use Case Descriptions

UC-01 : Register as Learner

Field	Value
Actors	Visitor, System
Preconditions	Visitor has a valid national ID and phone number.
Main flow	1. Visitor opens registration page. 2. Visitor enters national ID, name, phone number. 3. System validates ID format and uniqueness. 4. System requests a liveness (photo) capture. 5. System sends an SMS code. 6. Visitor enters the code. 7. Visitor sets a password. 8. System creates the account.
Alternate flow	4a. Liveness capture fails — visitor retries (max 3 attempts). 6a. Wrong code — SMS resent. 2a. ID already registered — system rejects and offers login/reset.
Postconditions	Verified learner account created.
Priority	M

UC-02 : Login

Field	Value
Actors	Learner, System
Preconditions	Account exists and is verified.

Field	Value
Main flow	1. Learner enters phone number and password. 2. System authenticates. 3. System opens learner dashboard.
Alternate flow	2a. Invalid credentials — message displayed. 2b. Account suspended — system shows reason and contact.
Postconditions	Learner sessions opened.
Priority	M

UC-03 : Study Lesson

Field	Value
Actors	Learner, System
Preconditions	Learner is logged in and previous lesson passed.
Main flow	1. Learner selects a lesson. 2. System displays content in the learner's language. 3. Learner marks lesson complete. 4. System records progress and unlocks quiz.
Alternate flow	3a. Learner closes mid-lesson — progress saved; lesson resumes later.
Postconditions	Lesson progress recorded; quiz unlocked.
Priority	M

UC-04 : Take Lesson Quiz

Field	Value
Actors	Learner, System
Preconditions	Lesson completed; quiz not yet passed.
Main flow	1. System generates a randomized quiz from the question bank. 2. Learner answers questions. 3. System scores the attempt. 4. If score >= 60%, quiz passed, next lesson unlocks. 5. If below, system delays retake and explains the gap.
Alternate flow	4a. Passed — spaced-repetition queue updated with answered questions. 5a. Failed — retake allowed after defined delay.
Postconditions	Attempt recorded; outcome shown.

Field	Value
Priority	M

UC-05 : Answer Verification Check-in

Field	Value
Actors	Learner, Instructor, System
Preconditions	Course in progress; check-in scheduled.
Main flow	1. System notifies learner of a check-in. 2. Learner responds within the time window. 3. (a) Automated: photo capture compared to registration photo. (b) Live: Instructor asks a spoken question about road law. 4. Instructor/system records result.
Alternate flow	2a. Timeout — recorded as "missed"; warning issued. 3a. Identity mismatch — recorded as "failed"; repeated failures suspend course.
Postconditions	Check-in result recorded and visible to School Officer.
Priority	M

UC-06 : Issue Certificate

Field	Value
Actors	School Officer, System
Preconditions	Course fully completed; all check-ins passed; payment settled.
Main flow	1. Officer selects learner. 2. System shows completion summary (lessons, quizzes, check-ins). 3. Officer confirms identity of learner (final check). 4. Officer clicks "Issue". 5. System generates unique serial + certificate PDF with QR code.
Alternate flow	3a. Identity cannot be confirmed — certificate blocked. 5a. Serial collision — system regenerates.
Postconditions	Certificate stored, serial published for verification.
Priority	M

UC-07 : Verify Certificate

Field	Value
Actors	RNP Officer / School Officer / Anyone (Visitor), System
Preconditions	Certificate exists; serial known.
Main flow	1. User opens verification page. 2. User scans QR or enters serial. 3. System shows status (VALID, ISSUED TO [name], date, school, course) and whether revoked.
Alternate flow	3a. Serial not found — system shows "NOT FOUND — possible forgery". 3b. Revoked — system shows "REVOKED" with reason.
Postconditions	Decision information displayed; verification logged.
Priority	M

UC-08 : Manage Question Bank

Field	Value
Actors	Instructor, System
Preconditions	Instructor role assigned.
Main flow	1. Instructor adds/edits questions with options and correct answer. 2. Instructor assigns topic, language and difficulty. 3. System stores question.
Alternate flow	3a. Duplicate question — system warns.
Postconditions	Question available to quiz generator.
Priority	M

UC-09 : Revoke Certificate

Field	Value
Actors	School Officer, System
Preconditions	Certificate issued; reason recorded (e.g. fraud discovered).
Main flow	1. Officer selects certificate. 2. Officer enters reason. 3. System marks certificate REVOKED and logs the action.
Postconditions	Verification page shows REVOKED.
Priority	S

UC-10 : Manage Accounts (Administrator)

Field	Value
Actors	Administrator, System
Preconditions	Administrator logged in.
Main flow	1. Admin lists users by role. 2. Admin creates, edits, suspends or deletes accounts. 3. System logs every action.
Postconditions	Accounts updated; audit trail complete.
Priority	M

UC-11 : Approve Instructor Qualification (Administrator / School Officer)

Field	Value
Actors	Instructor, School Officer / Administrator, System
Preconditions	Instructor account exists; qualification documents uploaded.
Main flow	1. Instructor uploads diploma, teaching certificate, and ANPAER/RNP registration number. 2. Officer/Admin reviews documents against the RNP requirement (secondary + diploma + teaching certificate, road-law specialisation). 3. Officer/Admin approves. 4. System marks instructor "certified and active".
Alternate flow	3a. Documents missing or expired — request re-upload. 4a. Certificate/registration later expires — instructor automatically deactivated from teaching duties.
Postconditions	Instructor can perform check-ins and be named on certificates (FR-46, FR-47).
Priority	M

6. Diagram Description (for report submission)

The main use case diagram shows five direct actors (Learner, Instructor, School Officer, RNP Officer, Administrator) and one indirect actor (Visitor). The central system block contains the eleven core use cases above.

- The **Learner** is the most active actor and participates in the core training loop: register, study, quiz, spaced repetition, check-in.
- The **Instructor** participates indirectly in the learning loop through check-ins and owns the question bank.
- The **School Officer** owns the certificate lifecycle (issue/revoke).
- The **RNP Officer** has read-only verification of certificates — a key trust relationship with the national authority.
- The **Administrator** manages the platform itself.

---

7. Traceability

Each use case is traced to its functional requirements (Document 2):

Use Case	Requirements
UC-01	FR-01 … FR-07
UC-02	FR-05, FR-06
UC-03	FR-08 … FR-12
UC-04	FR-13 … FR-19
UC-05	FR-20 … FR-24
UC-06	FR-25 … FR-31
UC-07	FR-28 … FR-30
UC-08	FR-13, FR-14
UC-09	FR-31
UC-10	FR-32 … FR-37
UC-11	FR-43 … FR-49

Uruhushya Academy

System Design (Architecture, ERD, Data Model)

---

1. Introduction

This document defines the technical architecture of the **Uruhushya Academy** platform: the overall architecture, the components, the entity-relationship diagram (ERD), and the detailed data model.

---

2. System Architecture

2.1 Architecture Style

The system uses a **three-tier client-server architecture**:

```
+--------------------+
|  Presentation      |   Browser on phone / tablet / desktop
|  (Frontend)        |   Responsive web app (JavaScript)
+--------------------+
          |
          | HTTPS (JSON)
+--------------------+
|  Application       |   Backend API
|  (Django / FastAPI)|    Business logic, auth, quizzes, certificates
+--------------------+
          |
          | SQL
+--------------------+
|  Data              |   PostgreSQL database
|  (DB + storage)    |   Media storage (photos, certificate PDFs)
+--------------------+
```

Rationale: separating the presentation layer from business logic and data makes each layer independently maintainable and testable — a core requirement of the assignment.

2.2 Components

Component	Technology (selected)	Responsibility
Frontend web app	HTML/CSS/JS (React or server-rendered templates)	Pages for learners, staff, verification.
Backend API	Django REST Framework	Auth, lessons, quizzes, spaced repetition, check-ins, certificates.
Database	PostgreSQL	Persistent storage.
Media storage	Local disk / object storage	Learner photos, certificate PDFs.
SMS gateway	SMS service provider	Phone verification and notifications.
Payment (V1+)	MoMo / Airtel Money APIs	Course fee collection.

2.3 Deployment Diagram (textual)

```
[User Device] --HTTPS--> [Reverse Proxy / Load Balancer (e.g. nginx)]
                                |
                                +--> [Web Server / Backend app]
                                            |
                                            +--> [PostgreSQL]
                                            +--> [Media storage]
                                            +--> [SMS API] (external)
                                            +--> [Payment API] (external)
```

2.4 Security Architecture

- All traffic over HTTPS (TLS).
- Passwords hashed (e.g. bcrypt/Argon2).
- JWT-based authentication for the API.
- Role-based access control (Learner / Instructor / School Officer / RNP Officer / Admin).
- Uploaded photos validated (type, size) and stored privately.
- Audit log writes for every certificate and admin action.

---

3. Entity-Relationship Diagram

3.1 Entities and Relationships

Core entities:

1. `User` — all persons on the platform (role: learner/instructor/ officer/admin).
2. `LearnerProfile` — identity details specific to a learner (national ID, photo, liveness status, language).
3. `InstructorProfile` — qualification record of an instructor (see 3.4): diplomas, teaching certificate, road-law specialisation, ANPAER/RNP registration number, document files, approval status.
4. `Lesson` — a training unit (topic, language, order, content).
5. `Question` — a quiz item with options and correct answer.

6. `QuizAttempt` — a learner's attempt at a quiz.
7. `CheckIn` — a verification event for a learner.
8. `Course` — the overall road-law course (maps to ANPAER syllabus).
9. `Enrollment` — link between learner and course (with progress).
10. `Certificate` — issued completion certificate.
11. `Payment` — course fee records.
12. `AuditLog` — every significant action.

3.2 Relationship Summary

- `User` 1—1 `LearnerProfile` (a profile belongs to one user).
- `User` 1—1 `InstructorProfile` (an instructor's qualification record belongs to one user).
- `InstructorProfile` 1—N `CheckIn` (only certified instructors perform check-ins).
- `InstructorProfile` 1—N `Certificate` (each certificate names its instructor).
- `LearnerProfile` 1—N `Enrollment` (a learner can enrol in a course once)
- `Course` 1—N `Enrollment`.
- `Course` 1—N `Lesson`.
- `Lesson` 1—N `Question` (questions tied to lessons/topics).
- `Enrollment` 1—N `QuizAttempt` (one attempt per learner per quiz).
- `LearnerProfile` 1—N `CheckIn`.
- `Enrollment` 1—N `CheckIn` (check-ins belong to a course).
- `Enrollment` 0—1 `Certificate` (a completed course earns one certificate).
- `LearnerProfile` 1—N `Payment`.
- `User` 1—N `AuditLog` (actor).

3.3 ERD — Mermaid source

This Mermaid code can be pasted at mermaid.live or in VS Code to render the diagram image.

```

---

4. Data Model (Tables)

For each table: **PK** = primary key, **FK** = foreign key.

4.1 user

Column	Type	Constraints
id	integer	PK
phone	varchar(15)	UNIQUE, NOT NULL
email	varchar(255)	NULL
password_hash	varchar(255)	NOT NULL
role	varchar(20)	learner/instructor/school_officer/rnp_officer/adr
created_at	timestamp	NOT NULL

4.2 learner_profile

Column	Type	Constraints
id	integer	PK
user_id	integer	FK → user.id
national_id	varchar(20)	UNIQUE, NOT NULL
name	varchar(150)	NOT NULL
photo	bytea / file ref	NOT NULL
liveness_ok	boolean	NOT NULL
language	varchar(10)	kinyarwanda/english/french
created_at	timestamp	NOT NULL

4.3 instructor_profile

Column	Type	Constraints
id	integer	PK
user_id	integer	FK → user.id, UNIQUE
name	varchar(150)	NOT NULL
diploma_cert	file ref	NOT NULL (secondary + diploma proof)
teaching_cert	file ref	NOT NULL
specialisation	varchar(50)	NOT NULL (road_law/technical)

Column	Type	Constraints
anpaer_reg_no	varchar(50)	NOT NULL
approved	boolean	NOT NULL
approved_by	integer	FK → user.id (School Officer/Admin)
approved_at	timestamp	NULL
expires_on	date	NULL (certificate/registration expiry)
created_at	timestamp	NOT NULL

> Only rows with `approved = true` and a not-expired qualification are considered "certified and active" (FR-45, FR-46).

4.4 course

Column	Type	Constraints
id	integer	PK
name	varchar(150)	NOT NULL
syllabus_version	varchar(50)	NOT NULL
price	decimal(10,2)	NOT NULL
created_at	timestamp	NOT NULL

4.5 enrollment

Column	Type	Constraints
id	integer	PK
learner_profile_id	integer	FK → learner_profile.id
course_id	integer	FK → course.id
start_date	date	NOT NULL
finish_date	date	NULL
progress	float	0–100
status	varchar(20)	active/completed/suspended

4.6 lesson

Column	Type	Constraints
id	integer	PK
course_id	integer	FK → course.id
title	varchar(200)	NOT NULL
topic	varchar(100)	NOT NULL
language	varchar(10)	NOT NULL
order	integer	NOT NULL
content	text	NOT NULL

4.7 question

Column	Type	Constraints
id	integer	PK
lesson_id	integer	FK → lesson.id
text	text	NOT NULL
options	jsonb	NOT NULL (array of 4 options)
correct_answer	varchar(500)	NOT NULL (hashed ref to option)
difficulty	varchar(10)	easy/medium/hard
topic	varchar(100)	NOT NULL
language	varchar(10)	NOT NULL

4.8 quiz_attempt

Column	Type	Constraints
id	integer	PK
enrollment_id	integer	FK → enrollment.id
learner_profile_id	integer	FK → learner_profile.id
lesson_id	integer	FK → lesson.id
score	integer	0–100
passed	boolean	NOT NULL

Column	Type	Constraints
attempted_at	timestamp	NOT NULL

4.9 check_in

Column	Type	Constraints
id	integer	PK
enrollment_id	integer	FK → enrollment.id
learner_profile_id	integer	FK → learner_profile.id
instructor_id	integer	FK → instructor_profile.id (nullable for automated checks)
type	varchar(20)	photo / live_call
status	varchar(20)	scheduled/passed/failed/missed
scheduled_at	timestamp	NOT NULL
responded_at	timestamp	NULL
note	text	NULL

4.10 certificate

Column	Type	Constraints
id	integer	PK
enrollment_id	integer	FK → enrollment.id, UNIQUE
instructor_id	integer	FK → instructor_profile.id
serial	varchar(40)	UNIQUE, NOT NULL
issued_on	date	NOT NULL
status	varchar(20)	valid/revoked
qr_code	varchar(255)	NOT NULL

4.11 payment

Column	Type	Constraints
id	integer	PK

Column	Type	Constraints
learner_profile_id	integer	FK → learner_profile.id
amount	decimal(10,2)	NOT NULL
method	varchar(30)	momo/airtel/card
reference	varchar(100)	NOT NULL
status	varchar(20)	pending/paid/failed/refunded
paid_at	timestamp	NULL

4.12 audit_log

Column	Type	Constraints
id	integer	PK
user_id	integer	FK → user.id
action	varchar(200)	NOT NULL
target	varchar(200)	NULL
timestamp	timestamp	NOT NULL

---

5. Sequence: Issue Certificate

```
Learner     System       Instructor  School Officer     Question Bank
 |            |              |            |                  |
 |--complete-->|             |            |                  |
 |            |--verify all quizzes/checkins-----------------|
 |            |<-----------passed (all)---|                  |
 |<--course complete--|      |            |                  |
 |            |<---final identity check---|                  |
 |            |<-------------issue cert---|                  |
 |            |--generate serial + QR--[generate pdf]        |
 |<--cert downloaded--|      |            |                  |
```

---

6. Traceability

Design artefact	Covers
Three-tier architecture	NFR-01, NFR-02, NFR-11

Design artefact	Covers
Security architecture (HTTPS, hashing, RBAC, audit)	NFR-03, NFR-04, NFR-05, NFR-09, NFR-10
ERD and data model	All data requirements (Section 5 of Document 2)
Certificate serial + QR + signature	FR-26, FR-28, FR-29, NFR-09

Course: Interactive Web Development

Uruhushya Academy

Technology Stack Justification

---

1. Introduction

This document justifies the technology choices for the **Uruhushya Academy** platform. The choices balance three things: suitability for the problem, ease of development and maintenance, and availability of skills and hosting in Rwanda.

---

2. Summary of the Stack

Layer	Technology	Choice Reason
Backend	Python — **Django** (with Django REST Framework)	Rapid development, batteries included, strong ORM and admin panel.
Frontend	HTML/CSS/JavaScript (**Django templates** or **React**)	Mobile-friendly, progressively enhanced; either works over the REST API.
Database	**PostgreSQL**	ACID, JSON support, reliability, Rwanda hosting availability.
Auth	Django auth + JWT	Secure sessions and API tokens.
Media	Local disk / object storage	Learner photos, certificate PDFs, and instructor qualification documents (diplomas, teaching certificates).
SMS	SMS gateway (local provider)	Phone verification and notifications.

Layer	Technology	Choice Reason
Payments	MTN MoMo / Airtel Money APIs	Reaches Rwandan users without bank cards.
Deployment	Linux server + nginx + Gunicorn	Lightweight, well documented.
Version control	Git / GitHub	Team collaboration (2 members), history and review.

---

3. Why Python and Django

1. **Django is "batteries included."** It provides authentication, an admin panel, forms, security protections (SQL injection, XSS, CSRF protection built in), and an ORM out of the box. This fits a team of two students who must also document the project — features we would otherwise have to build and secure ourselves.
2. **Rapid development.** The assignment requires a working system in a limited time. Django's structure (apps, models, views) maps directly to our modules (registration, lessons, quizzes, certificates), reducing friction.
3. **Admin panel for free.** The Django admin interface gives the School Officer and Administrator dashboards (manage learners, issue certificates) almost without extra coding — a major productivity gain.
4. **Big ecosystem and readable code.** Python is one of the most taught languages in Rwandan universities, so future maintainers and the visiting examiner can understand the code easily.
5. **Security defaults.** Certificate data, national IDs and photos are sensitive; Django's security defaults help satisfy our non-functional requirements (NFR-03 to NFR-05).

> **Note on FastAPI:** FastAPI would be chosen if the focus were purely a high-performance, asynchronous API. Django was selected because the project also needs an admin interface, forms and rapid full-stack delivery — Django reduces total code. The REST API (Django REST Framework) can still serve a React frontend later.

---

4. Why PostgreSQL

- Relational data (learners, courses, attempts, certificates) fits naturally in tables.
- JSONB columns support flexible quiz options.
- ACID transactions guarantee audit log and certificate integrity (NFR-09).
- Freely available, supported by Rwandan hosting providers, and the senior-level database used by many government platforms (including Irembo-related systems).

---

5. Why a Responsive JavaScript Frontend

- The primary user is a **24/7 worker on a smartphone** (FR-11).
- A responsive design works on Android 5+ and iOS 11+ (NFR-07) without building separate native apps.
- Both Django templates and React render well on phones; the decision sits with the developers based on time available. For this assignment, **Django templates with simple progressive JavaScript** is recommended because it arrives sooner and is easier to test; React can be adopted in a later phase without replacing the

backend.

---

6. Why SMS and Mobile Money

- Rwanda's official platforms (Irembo, Bank of Kigali, mobile operators) already rely on **USSD/SMS + Mobile Money** as the universal channel.
- Most learners have a phone number but not a bank card, so MTN MoMo and Airtel Money are the practical payment channels (FR-38).
- SMS verification is the cheapest way to prove phone ownership (FR-04).

6bis. Secure Storage of Instructor Qualifications

Because instructors must prove they are certified (secondary + diploma + teaching certificate, road-law specialisation — see FR-43…FR-49), the media layer also stores scanned qualification documents. Django's file uploads plus the PostgreSQL table `instructor_profile` keep the proof, its approval status and its expiry date together, and only approved (certified) records unlock teaching duties in the application logic.

---

7. Why nginx + Gunicorn on a Linux VPS

- A standard, well-documented deployment used across Rwandan startups.
- Low cost; a small VPS can serve the target of 5,000 concurrent learners (NFR-08) with horizontal scaling later.
- nginx handles HTTPS/SSL termination and static files; Gunicorn runs the Python application; PostgreSQL runs dedicated.

---

8. Alternatives Considered and Rejected

Alternative	Rejected because
Node.js (Express/Nest)	Doubles the language count (JS frontend + backend) for a two-person team; Django gives the admin panel for free.
Java Spring	Heavyweight, slower to write for this scope.
PHP (Laravel)	Viable, but Python is more aligned with the curriculum and easier to audit-grade.
SQLite	Not adequate for concurrent production use and multiple roles.
NoSQL (MongoDB)	Quiz/certificate data is strongly relational; joins needed.
Native Android + iOS apps	Doubles development and maintenance; responsive web reaches everyone.

---

9. Software Tools for the Team

Tool	Purpose
Git + GitHub	Version control, two-member collaboration, backups.
Visual Studio Code / PyCharm	Development.
PostgreSQL tooling (pgAdmin)	Database administration.
Postman / curl	API testing.
PlantUML / Mermaid / draw.io	Diagrams for this documentation.
Trello / GitHub Projects	Task tracking for the two members.

---

10. Traceability

- **Python/Django** → NFR-11 (maintainability), NFR-09 (integrity), NFR-03/04 (security).
- **PostgreSQL** → NFR-08 (scale), NFR-09 (ACID integrity).
- **Responsive web** → NFR-02 (3G), NFR-07 (mobile), FR-11.
- **SMS / MoMo** → FR-04, FR-38, FR-39.
- **HTTPS/nginx** → NFR-03, NFR-01 (availability).

Uruhushya Academy

Development Plan & Timeline

---

1. Introduction

This document presents the development plan for **Uruhushya Academy**: the development methodology, the phases, the planned timeline, the roles of the two team members, and the milestones with their deliverables.

---

2. Development Methodology

The team uses an **iterative, agile-inspired approach** tailored to an academic assignment:

- Each phase ends with a **working, inspectable result** (a deliverable).
- The two members work on separate modules in parallel where possible.
- Every module is tested as it is built.
- The documentation documents are produced **together with** the code, not after it, so the submission is consistent.

---

3. Phases and Timeline

The plan below assumes a total duration of **8 weeks**. Adjust the dates to match the real academic calendar.

Phase	Duration	Activities	Deliverable
P0 — Planning	Week 1	Requirements review, environment setup, GitHub repository, task board.	Project plan, repository.
P1 — Core setup	Week 1–2	Django project and apps, PostgreSQL schema, authentication, roles.	Working skeleton with login/register.

Phase	Duration	Activities	Deliverable
P2 — Content & Assessment	Week 2–4	Lessons, question bank, quiz engine, blocking checkpoints, spaced repetition.	Learner can study and pass quizzes.
P3 — Identity & Check-ins	Week 4–5	Liveness photo flow, SMS verification, random check-in scheduling.	Verified learner workflow.
P3b — Instructor Qualification	Week 5	Instructor profile, document upload (diploma, teaching certificate, ANPAER/RNP registration), approval workflow, expiry alerts.	Only certified (approved) instructors active.
P4 — Certificates	Week 5–6	Certificate generation (serial + QR), verification page, school officer dashboard.	Certificates issued and verified.
P5 — Payment & Admin	Week 6–7	Mobile Money integration, admin panel, reports, audit log.	Full administrative workflow.
P6 — Testing & Polish	Week 7–8	Security review, load/3G performance check, bug fixes, UX polish.	Tested, deployable system.
P7 — Submission	Week 8	Finalise documentation, user manual, demo video, presentation.	Final submission package.

---

4. Team Work Distribution

Two members split modules to reduce conflict and enable parallel work:

Member 1 — Backend & Data

- Django project setup, models, database.
- Authentication and role management.
- Quiz engine and spaced repetition logic.
- Certificate generation and verification API.
- Instructor qualification records and approval workflow (FR-43…FR-49).

Member 2 — Frontend & Integrations

- Interface templates (registration, lessons, quizzes, dashboard).
- SMS verification integration.

- Mobile Money payment integration.
- Verification page and certificate download view.

Jointly: requirements review, testing, documentation, and the demo.

> Swap duties in a middle week (e.g. Member 2 reviews backend code, Member 1 reviews UI) so both understand the whole system for the oral defence.

---

5. Effort Estimate

Task group	Estimated effort (person-days)
Planning and environment	2
Models and authentication	5
Lessons and question bank	6
Quiz and spaced repetition	7
Identity, SMS, check-ins, instructor qualifications	7
Certificates and verification	5
Payment and admin	4
Testing and security review	5
Documentation	6
Demo and presentation	2
Total	≈ **49 person-days**

Two members working 3–4 days/week produce ~6–8 person-days/week, fitting roughly 7–8 weeks.

---

6. Milestones

Milestone	Week	Exit criteria
M1 — Skeleton runs	2	Register/login works; admin can create lessons.
M2 — Learning loop works	4	Learner completes lesson → quiz → next lesson (blocking checkpoint).
M3 — Verification works	5	SMS proved, liveness recorded, random check-in scheduled and recorded.

Milestone	Week	Exit criteria
M3b — Instructor certification works	5	Instructor uploads documents; officer approves; only certified instructor can check-in / be named on certificate.
M4 — Certificate works	6	Serial + QR certificate issued and verified on public page.
M5 — Full workflow	7	Learner enrols, pays, studies, passes quiz, gets verified, receives certificate; officer verifies.
M6 — Final	8	All documentation delivered; demo prepared.

---

7. Testing Strategy

Level	What is tested
Unit tests	Model logic, quiz scoring, spaced repetition, serial generation, instructor approval logic.
API tests	Each endpoint (auth, lessons, quizzes, certificates).
Integration	SMS simulation, payment sandbox, certificate to verification page.
UI/UX	Phone-size screens, 3G speed, basic accessibility.
Security	Login brute-force protection, file upload validation, role access checks.

Tools: Django test framework / pytest, manual test checklist, and a test-data script (500 questions, sample learners).

---

8. Risks to the Plan

Risk	Mitigation
Scope creep in documentation	Keep P2–P4 locked to the specified requirements; C-requirements only if time allows.
SMS/API account delays	Start SMS/payment account requests in Week 1; use sandboxes meanwhile.

Risk	Mitigation
One member unavailable (exams)	Shared ownership; regular merge of work to GitHub; backup member across duties.
Slow mobile performance	Test early on real 3G; optimise images and page weight from P1.
Teacher feedback late	Submit documentation mid-way for review at M2 and M4, not only at the end.

---

9. Documentation Schedule

Document	Owner	Ready by
01 Project Description	Joint	Week 1
02 Requirements Specification	Joint	Week 2
03 Use Case Diagrams & Descriptions	Member 1	Week 2
04 System Design	Member 2	Week 3
05 Technology Stack Justification	Member 1	Week 3
06 Development Plan (this document)	Joint	Week 4
07 Risk Analysis & Accreditation Strategy	Member 2	Week 4
08 Glossary & References	Joint	Week 6

---

10. Definition of Done

A task is "done" when:

- The code is merged to GitHub with a clear commit message.
- Unit/API tests for it pass.
- It is demonstrated working in the running system.
- The related part of the documentation is updated.

Uruhushya Academy

Risk Analysis & Accreditation Strategy

1. Introduction

This document analyses the risks of the **Uruhushya Academy** project — technical, legal, financial and organisational — and defines the strategy for making the platform's certificate legitimate under the Rwandan legal framework (ANPAER and Rwanda National Police rules).

2. Legal and Regulatory Context

Under the reforms introduced by the Rwanda National Police in September 2026:

1. Every candidate must present, on exam day, **a certificate or proof from the driving school they attended**, confirming completion of the required training, before sitting the official theory test.
2. **Driving schools** must be licensed and are monitored by **ANPAER** (Rwanda Association for auto driving schools) together with the RNP.
3. Instructors must be certified (secondary school + diploma + teaching certificate) and specialise in either technical driving or road law.
4. Road-law lessons follow a nationally approved curriculum with a respected minimum duration.
5. Exams at RNP centres are increasingly automated (tablet-based).

Consequence: a certificate's validity does **not** come from the document itself but from the *issuing school's licence*. The platform must therefore attach itself to the legal chain.

2.1 The "Physical Classroom" Requirement and How the Platform Satisfies It

The reform was written around the **physical classroom**: it assumes a learner attends lessons in person, taught by certified instructors, over a minimum duration. An online platform must prove it preserves every element the reform was protecting:

Reform element	Physical classroom	Uruhushya Academy equivalent
Certified teachers	Certified road-law instructors teach in person.	The *same* certified instructors (secondary + diploma + teaching certificate, road-law specialisation) prepare, review and deliver the online content, and perform live check-ins.
School licence	Training happens under an ANPAER-licensed school.	The platform delivers under the partner school's licence; the school issues certificates.
Minimum duration	A learner must study over the official minimum period.	The course is paced over the same official minimum duration (calendar-based, not faster), enforced by the platform.
Verified attendance	Physical presence is observed by the teacher.	Identity-verified enrolment, liveness checks, and random live check-ins prove the *same person* did the training.
Traceable records	Paper registers.	Digital audit trail (learner, instructor, quizzes, check-ins, serials) the school can show ANPAER/RNP.

Key point: the reform does **not** require a building — it requires certified instructors, a licensed school, a genuine minimum duration and proof the learner actually studied. The platform replaces the *room*, not the *requirements*.

2.2 Instructor Qualification Requirements (RNP/ANPAER)

For every instructor on the platform, the following must hold — identical to the physical classroom:

1. **Minimum education:** secondary school completion.
2. **Professional diploma:** a relevant diploma (e.g. teaching / road transport / driving instruction).
3. **Teaching certificate:** a recognised teaching qualification.
4. **Specialisation:** road law (the lessons offered here), or technical driving for the practical side — not mixed.
5. **Employed by the licensed partner school** and registered with ANPAER/RNP.
6. **Records kept by the system:** the platform uploads and stores each instructor's documents (FR-43), marks them approved or rejected (FR-49), blocks non-certified instructors from teaching duties (FR-45, FR-46), and prints the instructor's name on every certificate (FR-47).

Failing any of these makes a certificate legally weak — see Risk R11 below.

---

3. Accreditation Strategy

3.1 Recommended Path (V1): Partnership with an ANPAER-Accredited School

```
[Uruhushya Academy (online platform)]
            |  Training service agreement
```

```
            v
[ANPAER-accredited partner school]
            |  Issues certificates under its licence
            v
[RNP theory test centre] --> accepts certificate on exam day
```

Steps:

1. Identify 1–2 licensed driving schools in Kigali (or the region) that lack an online channel.
2. Sign a service agreement: the platform delivers road-law training and verification; the school issues certificates under its licence.
3. Ensure the school's licence number and name appear on every certificate and on the verification page.
4. Map the platform's course to the nationally approved syllabus the school already uses, keeping the official lesson durations (e.g. 3 months of *total* training program with online self-paced study, plus recorded attendance for school reporting).
5. Keep audit records that the school can show ANPAER/RNP inspectors: learner identity, quiz results, check-in records, certificate serials.

3.2 Long-term Path: Becoming a Driving School

- Build the required **physical exam/training grounds** and vehicles to modern standards.
- Recruit certified technical instructors (secondary + diploma + teaching certificate).
- Apply for a school licence through **ANPAER** procedures.
- Pass RNP supervision visits.
- Then the platform itself can directly issue certificates.

This path is slower (many months) and is therefore Phase 2, not V1.

3.3 What the Platform Must Never Do

- Issue certificates in its own name without a licence.
- Call itself "accredited" without ANPAER approval.
- Understate the official course duration to make enrolments faster.
- Bypass the RNP theory test (the platform never "passes" anyone on the RNP exam).

---

4. Risk Register

Risks are rated by **Likelihood (L)** and **Impact (I)** on a scale of 1 (low) to 5 (high). **Exposure = L × I.**

#	Risk	L	I	Exposure	Mitigation
R1	The partner school loses or fails to renew its ANPAER licence.	2	5	10	Contract states licence validity; platform monitors licences; keep a backup partner school.

#	Risk	L	I	Exposure	Mitigation
R2	RNP changes certificate rules again after this assignment.	3	4	12	Follow RNP/ANPAER announcements; design certificate fields to match official requirements; keep PDF format flexible.
R3	Fraud: a learner gets someone else to do quizzes/check-ins.	3	5	15	Liveness photo at registration; random live check-ins; photo re-verification at issue; audit log.
R4	Fake certificate claims about the platform (impostor website).	3	4	12	Unique serial + QR verification page; HTTPS domain; "verify a certificate" publicly visible.
R5	Payment/SMS API failures (downtime).	3	3	9	Use local reliable gateways; queue and retry; sandbox fallback during development.
R6	Low adoption because workers distrust online training.	3	4	12	Display the partner school licence; provide a help line; free sample lessons; testimonial pilot.

#	Risk	L	I	Exposure	Mitigation
R7	Data protection breach (national IDs, photos).	2	5	10	Encryption, HTTPS, least-privilege roles, audit log, compliance with Law No. 058/2021 on data protection.
R8	Content does not match the actual RNP question syllabus.	3	4	12	Align question bank with the official road code and the partner school materials; review with instructors.
R9	Academic scope creep — system too big for the deadline.	4	3	12	Stay within requirements doc; cut C-requirements if time runs out; clear Milestones.
R10	Team/communication issues (2 members).	2	3	6	Daily short sync; GitHub issues; shared board.
R11	RNP/ANPAER reject certificates because the *teacher* is not certified, or because training looks "online-only" instead of school-based.	3	5	15	Platform enforces certified-instructor rules (FR-43…FR-49); certificates name the certified instructor and partner school; live check-ins by certified staff prove supervised training; keep official minimum duration.

#	Risk	L	I	Exposure	Mitigation
R12	An instructor's teaching certificate / ANPAER registration expires mid-course.	2	4	8	Store expiry dates ("expires_on") and alert School Officer (FR-48); suspend the affected learners only with a certified replacement instructor.

4.1 Highest Risks to Watch (Top 3)

1. **R3 — Identity fraud** (integrity of the whole idea).
2. **R2/R1 — Regulatory change or licence loss** (validity of certificates).
3. **R11 — Certificates rejected because instructors are not certified** (the platform's core legal risk).

---

5. Risk Response Plan Summary

Strategy	Risks covered
Avoid — never issue certificates without a licensed partner.	R1, R2, R11
Mitigate — identity liveness, check-ins, audit trail, certified-instructor enforcement.	R3, R4, R11, R12
Transfer — service agreements clearly allocate liability to the school for licensing, to payment/SMS providers for uptime.	R1, R5
Accept — content syllabus risk managed by continuous review.	R8, R9, R10

---

6. Compliance Checklist

- [ ] Partner school licence number displayed on public pages and certificates.
- [ ] Every instructor holds secondary + diploma + teaching certificate, road-law specialisation (FR-43…FR-47).
- [ ] Instructor qualification documents and expiry dates stored and monitored (FR-48).
- [ ] Course named to match the official road-law curriculum.
- [ ] Lesson duration policy consistent with ANPAER minimums.
- [ ] Privacy policy published (Law No. 058/2021).
- [ ] Certificate verification page open to RNP officers.
- [ ] Audit trail retained for at least the period required by the school/ANPAER.

7. Traceability

Risk response	Related requirement
Liveness + check-ins	FR-03, FR-20 … FR-24
Serial + QR verification	FR-26, FR-28, FR-29
Role-based access + audit	FR-32, FR-36, NFR-10
Certified-instructor enforcement	FR-43 … FR-49
Data protection	NFR-04, NFR-05
Partner school licence shown	FR-41

Glossary & References

1. Glossary

Term	Definition
ANPAER	The Rwanda Association for auto driving schools; licences and monitors driving schools.
RNP	Rwanda National Police; runs the official theory and practical driving tests and issues licences.
Theory test	The official computer-based or paper test of road-code knowledge administered by RNP; a Provisional Driving Licence (PDL) requires passing it.
Road law / road code	The national rules of the road: traffic signs, signals, right-of-way, penalties.
Driving school certificate	Proof from a driving school that the learner completed the required training; required to sit the RNP theory test.
Certified road-law instructor	A teacher who meets the RNP/ANPAER requirement — minimum secondary school + diploma + teaching certificate — and specialises in road law; the only staff allowed to teach road-law lessons or perform check-ins.
Teaching certificate	The recognised teaching qualification required of every driving-school instructor under the September 2026 reform.
ANPAER/RNP registration number	The identifier proving an instructor is registered with the association/school supervising them.

Term	Definition
Physical classroom requirement	The reform's assumption that training happens in a school classroom over a minimum duration; the platform preserves the certified-teacher, licensed-school and minimum-duration elements while moving the room online.
Irembo	Rwanda's official e-government service platform used for licence applications and test registration.
Provisional Driving Licence (PDL)	The first stage licence obtained after passing the RNP theory test; lets the holder practise with a supervisor.
Definitive Driving Licence	The full licence obtained after passing the practical test.
Learner	In this project, the person studying road law online to obtain the training certificate.
E-learning / self-paced learning	Training a learner completes at their own schedule, without fixed classroom attendance.
Liveness check	A system that asks for a live photo to prove the person is physically present (not a photo of a photo).
Blocking checkpoint	A quiz/test that must be passed before the next lesson unlocks.
Spaced repetition	A revision technique that re-asks material over growing intervals to build long-term memory.
Check-in	A random identity/progress verification event during the course.
Certificate serial number	A unique identifier printed on and stored with each certificate, used for online verification.
QR code	A scannable code on the certificate that links to its verification page.
Verification page	A public page where anyone can enter a serial number and check a certificate's status.
ERD	Entity-Relationship Diagram — a diagram of the database tables and their relationships.
UML	Unified Modeling Language — standard diagrams (use cases, sequence, classes) used in system analysis.
MVC / three-tier architecture	Separating presentation, business logic, and data layers.
CRUD	Create, Read, Update, Delete — basic operations on stored records.

Term	Definition
JWT	JSON Web Token — a compact token used to authenticate API calls.
ORCID / OCR (if relevant)	Not used; listed only to avoid confusion with the identity checks above.

Chapter 1. Introduction

1.1 Historical background of the case study

Getting a driving licence in Rwanda is a two-stage process administered by the **Rwanda National Police (RNP)**. A candidate first passes a **theory test** on road law (the road code) to obtain a **Provisional Driving Licence (PDL)**, then a practical test to obtain the **definitive driving licence**. Applications and payments are handled on the national e-government platform, **Irembo** (www.irembo.gov.rw), also accessible via USSD `*909#`.

In 2026, the RNP, working with the association of driving schools (**ANPAER**), introduced major reforms to the training and examination system. From **September 2026**, every candidate must present, on exam day, a **certificate or proof from a driving school** confirming that they completed the required road-law training before being allowed to sit the theory test. The reforms also require road-law lessons to follow an approved curriculum with a respected minimum duration, and to be taught by certified instructors. Because these reforms were written around the physical classroom, they require the *teacher* — not the room: instructors must hold minimum secondary education, a diploma and a teaching certificate, and specialise in road law; training must run under an ANPAER-licensed school over the official minimum duration. This project keeps those exact requirements and only moves the delivery online.

The case study of this project is a **partner driving school** accredited by ANPAER, which delivers road-law training but currently has **no online channel**. The school loses learners who cannot attend fixed classroom sessions, and it lacks a digital, verifiable record of training. This project, **Uruhushya Academy**, is the online platform that serves such a school.

1.2 Problem statement

The reforms above solved one problem but created another:

1. **Certificates can be faked.** Before the reform, there was no reliable way to prove a person studied road law. Requiring a school certificate improves this, but a paper certificate is still easy to forge or buy.

2. **Working people cannot attend the classroom.** The certificate is tied to physical classroom attendance of a fixed duration (often about three months). People who work long or irregular hours — truck drivers, nurses, security guards, market traders — cannot attend these sessions. They are therefore forced either to abandon getting a licence or to buy a fraudulent certificate, which defeats the whole purpose of the reform.

The root cause is that the current system equates **attendance** with **learning**. A person may sit in class for three months and learn nothing; another may study alone consistently and learn everything. There is no system that recognises verifiable self-study.

1.3 Objectives of the project

Overall objective: To design and develop a web-based platform that delivers the approved road-law training online, verifies that learning genuinely took place, and issues a certificate that the RNP accepts on theory-test day.

Specific objectives:

1. To analyse the RNP/ANPAER road-law training and certification requirements.
2. To design an online, self-paced learning model whose completion cannot reasonably be faked.
3. To develop a responsive web application implementing the model (registration, lessons, quizzes, spaced repetition, check-ins, and certificate generation).
4. To make the certificate verifiable online through a unique serial number and QR code.
5. To test the system and evaluate it with real learners.

1.4 Expected Outcomes

- A responsive web application reachable from a phone, tablet or computer.
- A learner able to complete the road-law course at any hour and obtain an **already-verified training certificate**.
- A **public verification page** where an RNP officer can confirm a certificate in seconds.
- A dashboard for the partner school to monitor learners and issue certificates.
- A reduction in fraudulent certificates and an increase in access to training for working people.

1.5 Project Rationale (Importance to the community)

- **Access:** gives 24/7 workers and rural learners a legal path to the required training without losing work time.
- **Road safety:** ensures more licence holders actually understand road law, which reduces accidents.
- **Integrity:** replaces forgeable paper with an online-verifiable certificate, helping the RNP and ANPAER fight fraud.
- **Economic:** learners and schools spend less; training scales beyond the walls of a classroom.
- **National alignment:** supports Rwanda's digital-government agenda (Irembo) and the road-safety goals of the RNP.

Chapter 2. System Analysis and Design

2.1 System Analysis

The current process requires learners to physically attend classroom road-law lessons for a fixed period, after which the school writes a paper certificate. The proposed system keeps the official curriculum and the official certificate, but moves the *learning* online and attaches verifiable evidence (identity checks, quiz records, check-ins) to that learning.

Processes needed: registration and identity verification, content delivery, assessment, spaced repetition, verification check-ins, certificate issuance, certificate verification, and administration.

2.1.1 Intended users of the project

User	Role
Learner	A person aged 18+ studying road law online.
Instructor	Certified road-law trainer (secondary + diploma + teaching certificate, road-law specialisation); manages content and performs live check-ins; named on certificates.
School Officer	Staff of the accredited partner school; approves instructor qualifications; issues/revokes certificates.
RNP Officer	Verifies a certificate before allowing the theory test.
Administrator	Manages users, roles, and system settings.

2.1.2 Intended system partners

Partner	Contribution
ANPAER-accredited driving school	Issues the certificate under its licence; supplies official curriculum.
Rwanda National Police (RNP)	Recognises the certificate; the destination of the learner (theory test).
ANPAER	Regulatory association for driving schools.

Partner	Contribution
SMS gateway provider	Sends OTP and notification messages.
Mobile Money operators (MTN/Airtel)	Collect course fees.
Irembo	The learner's next step (theory-test registration and payment) — integration/instruction point.

2.2 System Design

Uruhushya Academy is designed as a **three-tier web application**:

- **Presentation tier** — responsive HTML/CSS/JavaScript pages.
- **Application tier** — Python (Django) business logic and REST API.
- **Data tier** — PostgreSQL database and media storage.

2.2.1 High-Level Architecture

Figure 1 — High-Level System Architecture of Uruhushya Academy

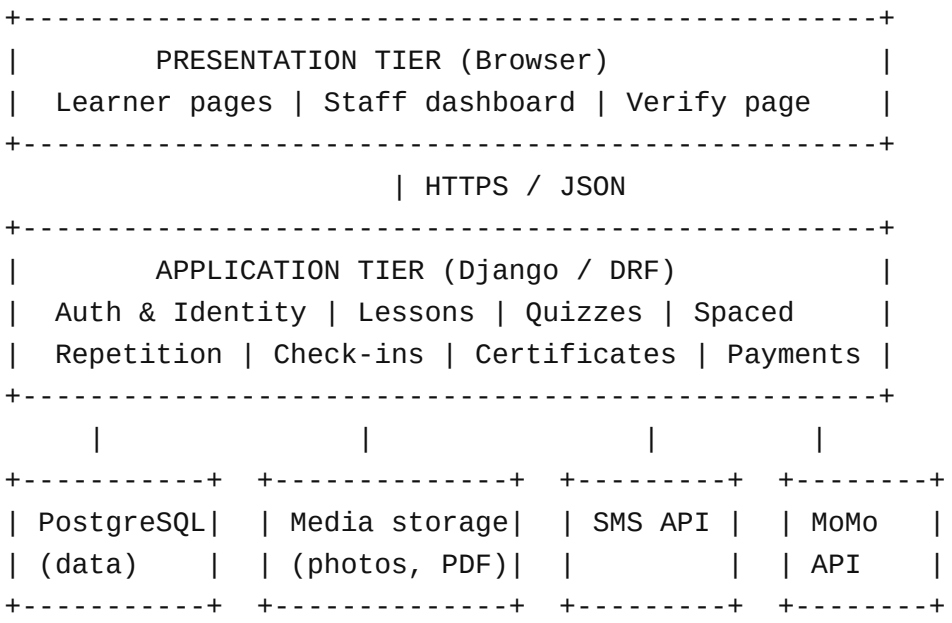

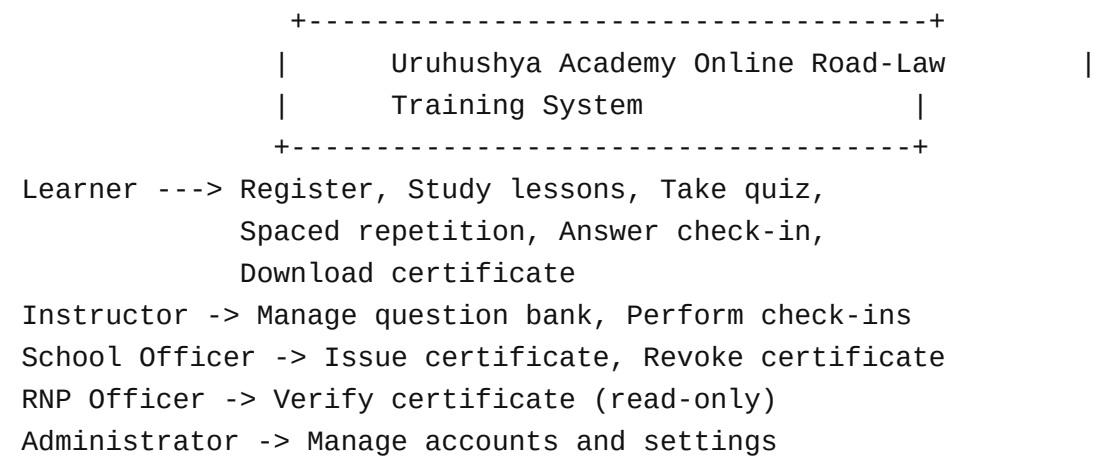

Figure 2 — Use Case Diagram of Uruhushya Academy

2.2.2 UI design (sketch of the UI module) and Flowcharts

Figure 3 — Learner Registration (Identity Verification) Flowchart

```
Start
 |
Enter national ID + name + phone
 |
Validate ID (format & uniqueness) --(invalid)--> Show error --> back
 | (valid)
Capture live photo (liveness check)
 |
Send SMS OTP ---- OTP correct? --(no)--> Resend OTP --> back
 | (yes)
Set password
 |
Create verified account
 |
End
```

Figure 4 — Lesson-to-Quiz (Blocking Checkpoint) Flowchart

```
Start lesson --> Read content --> Mark complete
  |
Generate randomized quiz
  |
Learner answers --> Score
  |
Score >= 60%? --(no)--> Show feedback --> wait delay --> Retake
  | (yes)
Unlock next lesson
  |
Queue answered questions for spaced repetition
  |
End
```

Figure 5 — Certificate Issuance and Verification Flowchart

```
Course complete & all check-ins passed?
  | (yes)
School Officer confirms learner identity
  |
Generate unique serial + QR code
  |
Create certificate PDF --> store
  |
Learner downloads certificate
  |
RNP Officer scans QR / enters serial on verify page
  |
Valid / Revoked / Not found  --> End
```

UI wireframes (sketch):

- **Figure 7 — Landing page:** header with logo "Uruhushya Academy"; hero text; three steps (Learn -> Practice -> Get certified); the partner school's ANPAER licence number; "Start learning" button; "Verify a certificate" link.
- **Figure 8 — Learner dashboard:** progress bar; current lesson card; next quiz; schedule of check-ins; certificate status.
- **Figure 9 — Lesson page:** lesson title; text and signs images; previous/ next navigation; "Take quiz" button (locked until lesson read).
- **Figure 10 — Verification page:** input box for serial number; result panel (green VALID / red REVOKED / grey NOT FOUND); QR scan hint.

2.2.3 Database design with ERD and relationships

Figure 6 — Entity-Relationship Diagram of Uruhushya Academy

Core entities and relationships:

```
USER 1---1 LEARNER_PROFILE
USER 1---1 INSTRUCTOR_PROFILE
INSTRUCTOR_PROFILE 1---N CHECK_IN   (certified instructor performs check-ins)
INSTRUCTOR_PROFILE 1---N CERTIFICATE (certificate names its instructor)
LEARNER_PROFILE 1---N ENROLLMENT
COURSE 1---N ENROLLMENT
COURSE 1---N LESSON
LESSON 1---N QUESTION
ENROLLMENT 1---N QUIZ_ATTEMPT
LEARNER_PROFILE 1---N CHECK_IN
ENROLLMENT 1---N CHECK_IN
ENROLLMENT 1---0..1 CERTIFICATE
LEARNER_PROFILE 1---N PAYMENT
USER 1---N AUDIT_LOG
```

Entity attributes (summary):

Entity	Key attributes
USER	id (PK), phone, email, password_hash, role, created_at
LEARNER_PROFILE	id (PK), user_id (FK), national_id, name, photo, liveness_ok, language
INSTRUCTOR_PROFILE	id (PK), user_id (FK, unique), name, diploma_cert, teaching_cert, specialisation (road_law/technical), anpaer_reg_no, approved, approved_by, approved_at, expires_on
COURSE	id (PK), name, syllabus_version, price
ENROLLMENT	id (PK), learner_profile_id (FK), course_id (FK), start_date, finish_date, progress, status
LESSON	id (PK), course_id (FK), title, topic, language, order, content

Entity	Key attributes
QUESTION	id (PK), lesson_id (FK), text, options, correct_answer, difficulty, topic
QUIZ_ATTEMPT	id (PK), enrollment_id (FK), learner_profile_id (FK), lesson_id (FK), score, passed, attempted_at
CHECK_IN	id (PK), enrollment_id (FK), learner_profile_id (FK), instructor_id (FK, nullable), type, status, scheduled_at, responded_at
CERTIFICATE	id (PK), enrollment_id (FK, unique), instructor_id (FK), serial (unique), issued_on, status, qr_code
PAYMENT	id (PK), learner_profile_id (FK), amount, method, reference, status, paid_at
AUDIT_LOG	id (PK), user_id (FK), action, target, timestamp

Relationships in words:

- One user has exactly one learner profile (for learners) or one instructor profile (for instructors).
- Every check-in is linked to the certified instructor who performed it (when live), so RNP can trace each verification to a qualified teacher.
- A learner profile has one enrolment per course.
- A course contains many lessons; a lesson has many questions.
- An enrolment produces many quiz attempts and many check-ins.
- A completed enrolment earns at most one certificate; the certificate names the enrolled learner and the instructor assigned to their course.
- Certificates and admin actions are recorded in the audit log.

Chapter 3. Implementation

3.1 Introduction of the section

This chapter presents the implemented system through screenshots with captions and a discussion of each page. The platform was implemented with the structure described in Chapter 2. *(During implementation, replace the placeholders below with actual screenshots and complete the discussion of each screen.)*

3.2 Screenshots with captions and discussion

Figure 11 — Registration page
Caption: Learner registration with national ID, phone and liveness photo.
Discussion: This page is the entry point. The learner enters their national ID and phone number; the system validates the ID format and uniqueness, requests a live photo to confirm presence (liveness), and sends an SMS one-time password. This screen is what makes the whole system trustworthy, because it binds the training record to a real, present person. *(~one page of discussion)*

Figure 12 — Login page
Caption: Learner/School Officer login with phone number and password.
Discussion: Authenticates users and routes them to the correct dashboard by role (learner, instructor, school officer, administrator). Passwords are hashed; sessions use secure tokens. *(~one page)*

Figure 13 — Learner dashboard
Caption: Learner progress dashboard.
Discussion: Shows the progress bar, the current lesson, the next quiz, the schedule of verification check-ins, and certificate status. It gives the learner clarity on what to do next, at any hour. *(~one page)*

Figure 14 — Lesson page
Caption: Road-law lesson with signs and rules.
Discussion: Presents approved curriculum content in the learner's chosen language (Kinyarwanda, English, French). The "Take quiz" button is locked until the lesson is completed, enforcing the blocking-checkpoint model. *(~one page)*

Figure 15 — Quiz page
Caption: Randomized lesson quiz with instant scoring.
Discussion: Generates a randomized quiz from the question bank, scores it, and unlocks the next lesson at 60% or above. Correctly answered questions are queued for spaced repetition so knowledge is tested again days later. *(~one page)*

Figure 16 — Certificate page
Caption: Generated certificate with serial number, QR code, and the names of the certified instructor and partner school.
Discussion: Issued by the school officer only after all check-ins pass and only when the assigned instructor is certified (secondary + diploma + teaching certificate, road-law specialisation). Contains the learner name, ID, course, dates, the partner school's ANPAER licence number, the certified instructor's name, a unique serial, and a QR linking to the verification page — so RNP sees not just a paper, but who taught, where, and that it is verifiable. *(~one page)*

Figure 17 — Certificate verification page
Caption: Public verification result for RNP officers.
Discussion: Anyone (especially the RNP officer at the test centre) can enter a serial or scan the QR to see VALID / REVOKED / NOT FOUND. This turns a paper certificate into a live, checkable record. *(~one page)*

Figure 18 — School officer dashboard
Caption: Certificate management and learner monitoring.
Discussion: Lists learners, completion status and check-in results, and provides the issue/revoke actions with an audit trail. *(~one page)*

Chapter 4. Conclusion and Recommendation

State of the implemented system. The Uruhushya Academy platform achieves the core objectives: online registration with identity verification, self-paced lessons, blocking-checkpoint quizzes, spaced repetition, verification check-ins, verifiable certificates, and certified-instructor compliance (qualification records so only certified road-law instructors teach and are named on certificates). At the time of reporting, the system meets approximately **[___]%** of the objectives. *(Insert the actual percentage and explain what is complete and what remains — for example, if payments and SMS live integration are not yet deployed, state this honestly.)*

Recommendations:

- **To the lecturer (technicalities):** recommend continuing the project toward full integration with the RNP/Irembo workflow, and adding automated tests for the certificate and verification modules.
- **To the school (time constraints):** recommend a phased rollout and a small pilot group so feedback is gathered before scaling, given limited time and resources.
- **To the partners (school owners):** recommend adopting the platform as the official online channel, keeping the ANPAER licence and curriculum data up to date, and training staff on the officer dashboard.
- **To the users (learners):** recommend basic digital-literacy guidance and a help line, so workers new to online learning can complete the course confidently.
- **To the beneficiaries (learners/customers):** recommend that they verify their own certificate after issuance and keep their serial number safe for the RNP theory-test day.

Appendix

- **GitHub repository (deployed project):** [repository URL]
- **Account/username:** [demo account]
- **Password:** [demo password]

> Note: replace the placeholders in this report with the real repository link and demo credentials before submission.

Uruhushya Academy

Name Reservation Application

Submitted to: Rwanda Development Board (RDB) — Company Registration Services, Kigali, Rwanda
Submission method: Online at office.rdb.rw
Application type: Reservation of a proposed company name
Applicant contact: 0793201162 — mkbantu56@gmail.com
Date: 18 September 2026

---

1. Request

Respectfully request the reservation of a company name for the business **Uruhushya Academy**, an online road-law training and certification company, pending the formal incorporation of the company.

2. Proposed Names (in order of preference)

Priority	Proposed Name
1	Uruhushya Academy Ltd
2	Uruhushya Ltd
3	Uruhushya Learning Ltd

> "Uruhushya" is a Kinyarwanda word meaning *permission / authorisation*. It does not contain restricted words (such as *Rwanda, National, Authority, Police, Government, Bank, Institute*) and is intended to reflect the company's role of granting verified authorisation to sit the driving test.

3. Description of Business Activity

The company will operate an **online e-learning platform** that delivers the nationally approved **road-law (driving theory) training** in Rwanda and issues a **digitally verifiable certificate** accepted by the Rwanda National Police (RNP) on the official theory test day.

- Self-paced road-code lessons in Kinyarwanda, English and French.
- Verified progress checkpoints and identity checks to prevent fraud.
- Certificates with a unique serial number and QR code, verifiable online.
- Training delivered through, and certified by, licensed (ANPAER-accredited) partner driving schools until the company obtains its own licence.

4. Applicant Details

Field	Details
Applicant name	Mukundabantu Mohammed
National ID (NID)	1200580142391004
Phone	0793201162
Email	mkbantu56@gmail.com

5. Consent and Contact

The applicants accept the terms and conditions of the RDB name reservation process and can be reached at any time for clarification at the contact details above.

Prepared for submission through the RDB online portal.

Article 2: Speed limitation for public and commercial vehicles

The Presidential Order n° 85/01 of 02/09/2002 regulating general traffic police and road traffic is complemented by Article 30 bis stated as follows:

"Article 30 *bis*: Speed limitation for public and commercial transport vehicles

Subject to provisions of Articles 29 and 30 of this Order, a public or goods transport vehicle must not exceed the speed of sixty kilometer per hour (60 km/h).

Any public or goods transport vehicle must be equipped with speed governors to control maximum road speed. The speed governors shall be specified in applicable national standards developed by the authority in charge of standards development in the Country.

A qualified agent may stop any public or goods transport vehicle for the verification of installation and proper functioning of a speed governor.

Article 2: Limitation de vitesse pour les véhicules de transports en commun et utilitaires

L'Arrêté Présidentiel n° 85/01 du 02/09/2002 portant règlement général de la police du roulage et de la circulation routière est complété par l'article 30 bis libellé comme suit:

"Article 30 *bis*: Limitation de vitesse pour les véhicules de transport en commun et de marchandise

Sous réserve des dispositions des articles 29 et 30 du présent arrêté, un véhicule de transport public ou de transport de marchandise ne doit pas dépasser une vitesse de soixante kilomètre par heure (60 km/h).

Tout véhicule de transport public ou de transport de marchandise doit être équipé du régulateur de vitesse pour pouvoir contrôler et limiter la vitesse maximale sur route. Les régulateurs de vitesse doivent être spécifiés dans les normes nationales applicables, mis en place par l'autorité chargée de l'élaboration de normes dans le pays.

Un agent qualifié peut arrêter tout véhicule de transport public ou de transport de marchandise pour la vérification de l'installation et du bon fonctionnement du régulateur de vitesse.

Muri iyi ngingo, Utugabanyamuvuduko ni utwuma cyangwa uburyo bukoreshwa mu kurinda cyangwa kubuza kurenza umuvuduko w'ikinyabiziga ntarengwa wagenwe.

For the purpose of this Article, speed Governors shall mean a device used to measure and regulate the maximum speed of a vehicle.

Aux fins du présent article, un régulateur de vitesse est un dispositif destiné à réguler ou stabiliser une vitesse maximale d'un véhicule.

Imodoka zivugwa muri iyi ngingo zifite igihe kitarenze umwaka umwe (1) uhereye igihe iri teka ritangarijwe mu igazeti ya Leta ya Repubulika y'u Rwanda kugira ngo zubahirize ibiteganywa n'iri teka".

Vehicles referred to in this Article shall have a period not exceeding one (1) year from the date of the publications of this Order in Official Gazette of the Republic of Rwanda to comply with this Order".

Les véhicules visés au présent article disposent d'un délai n'excédant pas une (1) année à partir de la publication du présent arrêté au Journal Officiel de la République du Rwanda pour se conformer aux dispositions du présent arrêté".

Ingingo ya 3: Ibyuma biyobora, uburyo bwo gusubira inyuma n'ibyangombwa by'umutekano byitwazwa ku binyabiziga

Article 3: Steering apparatus, reversing gear system and security accessories

Article 3: Dispositifs de direction, de marche arrière et accessoires de sécurité

Ingingo ya 88 y'Iteka rya Perezida n° 85/01 ryo ku wa 02/02/2002 rishyiraho amabwiriza rusange agenga imihanda n'uburyo bwo kuyigendamo ihinduwe kandi yujujwe ku buryo bukurikira :

Article 88 of the Presidential Decree n° 85/01 of 2/09/ 2002 regulating General Traffic Police and Road Traffic is modified and complemented as follows:

L'Article 88 de l'Arrêté Présidentiel n° 85/01 du 02/09/2002 portant règlement général de la police du roulage et de la circulation routière est modifié et complété comme suit:

"Buri kinyabiziga kigendeshwa na moteri kigomba kugira ibyuma biyobora bikomeye bituma umuyobozi akata ikinyabiziga cye ku buryo bworoshye, bwihuse kandi bwizewe.

"Every motor vehicle must be provided with a strong steering apparatus allowing the driver to change easily, quickly and safely the direction of his/her the motor vehicle.

"Tout véhicule automoteur doit être muni d'un appareil de direction robuste permettant au conducteur de changer facilement, rapidement et sûrement la direction de son véhicule.

Imodoka zose zigomba gufatira ibyapa mu Rwanda, zigomba kugira ibyuma biyobora ku ruhande rwazo rw'ibumoso uretse amakamyo y'ubwikorezi afite ubushobozi bwo kwikorera nibura toni makumyabiri (20), amabisi akora akazi ko gutwara abagenzi ku buryo bwambukiranya imipaka n'imashini zikoreshwa mu bwubatsi bw'imihanda **.**

All motor vehicles to be registered in Rwanda must have a steering apparatus on the left hand side except the trucks having at least twenty (20) tonnes loading capacity, buses used for cross-border public transport and road tractors.

Tous les véhicules automoteurs devant être immatriculés au Rwanda, doivent avoir les dispositifs de direction sur leur côté gauche à l'exception des camions de transport qui ont une charge minimale de vingt (20) tonnes, les bus utilisés pour le transport publique transfrontalier et les tracteurs routiers.

Icyakora, imodoka zinyura mu Rwanda cyangwa iz'abanyamahanga bagenderera Igihugu ku mpamvu zinyuranye zifite ibyuma biziyobora iburyo, zemerewe kugenda ku mihanda yo mu Gihugu mu gihe kitarenze amezi atatu (3). Iyo icyo gihe kirenze, ntizishobora kugenda zidafite uruhushya rwa Minisitiri ufite gutwara abantu n'ibintu mu nshingano ze.

However, vehicles on transit or belonging to foreigners visiting Rwanda for different purposes with steering apparatus on the right hand side shall be allowed to circulate on Rwandan roads for a period not exceeding three (3) months. When this period expires, an authorization from the Minister in charge of transport shall be required for their circulation.

Toutefois, les véhicules automoteurs en transit ou ceux des étrangers en séjour au pays pour diverses raisons qui ont des dispositifs de direction à droite, ont un délai ne dépassant pas trois (3) mois pour circuler sur les voiries du pays. Lorsque ce délai est expiré, une autorisation du Ministre ayant le transport dans ses attributions est requise pour leur circulation.

Buri modoka igomba kugira uburyo bwo gusubira inyuma bukoreshwa umuntu yicaye ku ntebe y'umuyobozi.

Every motor vehicle must be equipped with a reversing gear system which can be operated from the driving place.

Tout véhicule automobile doit être muni d'un dispositif de marche arrière manœuvrable à partir de la place du conducteur.

Ikinyabiziga cyose gifite ubushobozi bwo kurenza umuvuduko wa kilometero mirongo ine mu isaha (40 km/h) kigomba kugira icyerekana umuvuduko kiri aho umuyobozi areba kandi kigahora cyitabwaho kugira ngo kigumye gukora neza.

Any motor vehicle with the capacity of exceeding the speed of forty kilometres per hour (40 km/h) must be equipped with a speed indicator located at clear sight of the driver and be constantly in good working condition.

Tout véhicule ayant une capacité de dépasser une vitesse de quarante kilomètre par heure (40 km/h) doit être muni d'un indicateur de vitesse placé en vue du conducteur et maintenu constamment en bon état de fonctionnement.

Buri modoka yagenewe gutwara abantu, ariko umubare wabo ntarengwa ukaba munsi y'abantu batandatu (6) umuyobozi abariwemo, igomba kugira imikandara yo kurinda ibyago igenewe umuyobozi n'umugenzi wicaye ku ntebe y'imbere. Ishobora no kugira imikandara ku zindi ntebe z'inyuma.

Every motor vehicle assigned to transport people of which the maximum number of occupants is below six (6) including the driver, must be equipped with security belts for the driver and the passenger occupying the front seat of the vehicle. It can also have belts on rear seats.

Tout véhicule automobile affecté au transport de personnes dont le nombre maximum d'occupants est inférieur à six (6), le conducteur y compris, doit être doté de ceintures de sécurité destinées au conducteur et au passager occupant le siège avant du véhicule. Il peut également avoir des ceintures sur les autres sièges arrière.

Ibiranga imikandara yo kurinda ibyago bigenwa na Minisitiri ufite gutwara Abantu n'ibintu mu nshingano ze.

The characteristics of seat belts are to be determined by the Minister in charge of transport.

Les caractéristiques auxquelles doivent répondre les ceintures de sécurité sont déterminées par le Ministre ayant le transport dans ses attributions.

Buri kinyabiziga kigomba kugira ibintu bikurikira :

1° icyapa kiburira cya mpandeshatu zingana nibura na santimetero mirongo ine (40) buri ruhande, imikaba y'ibara ritukura ingana nibura na santimetero eshanu (5) z'ubugari, byaba bifite indiba ikaba igomba kuba ifite ibara rigaragara, imikaba y'ibara ritukura ibengerana cyangwa ifite umusozo ngarurarumuri. Ibyo bikoresho byose bigomba kuba bishobora guhagarikwa ku buryo bufashe.

2° Agahago k'ubutabazi karimo nibura ibipfuko bine (4) bitanduza byagenewe buri muntu, udufatisho tw'ibipfuko bine (4) cyangwa ibikwasi bine (4) bitifungura, agacupa k'umuti wo kwica mikorobi. Ako gahago kagomba kuba kanditseho ibi bikurikira: "ubutabazi bwihutirwa mu gihe hategerejwe muganga" "gufasha guhumeka umunwa ku w'uwundi".

3° ikintu kiyibuza kwibwa gituma itava aho iri cyangwa kigafunga icyuma cyayo cy'ingenzi igihe ihagaritswe igihe kirekire.

Ikinyabiziga kigendeshwa na moteri kiriho ibyuma ntamenwa cyangwa ikindi cyose gituma gikoreshwa mu gutera cyangwa kwitabara ntigishobora kugenda mu nzira nyabagendwa kidafite uruhushya rwihariye rwa Minisitiri ufite gutwara abantu n'ibintu

Every motor vehicle must have the following accessories :

1° a danger signal consisting of an equilateral triangle of at least forty centimetre (40 cm) of size, with red border of at least fifty centimetre (50 cm) of width, a clear-coloured bottom if they have one, the red borders being lightened transparently or provided with reflecting bandage All those accessories shall be able to stand in a vertical and stable position.

2° an emergency box containing at least four (4) individual bandages of sterilised gauze, four (4) site clips for bandages or four (4) safety pins, a small bottle of disinfectant. The box must be marked with the following notice: "emergency care waiting for the doctor's arrival" and "artificial breathing by mouth to mouth".

3° a burglar proof device to avoid the breaking down or damaging of an essential auto parts when the motor vehicle is in parking for a long time.

A motor vehicle equipped with armour or any other device permitting to use it in aggression or defence cannot move on the public way without a special authorisation of the Minister in charge of transport or his/her representative. However this requirement shall not be applicable to Armed

Tout véhicule automoteur doit avoir les accessoires suivants :

1° un signal de danger consistant en un triangle équilatéral d'au moins quarante centimètre (40 cm) de côté, à bords rouge d'au moins cinquante centimètre (50cm) de largeur, s'ils ont un fond, celui-ci avoir une couleur claire, les bords rouges éclairés et transparents et munis d'une bande reflétant. Tous ces accessoires doivent pouvoir être placé en position verticale stable.

2° une trousse de secours contenant au minimum quatre (4) pansements individuels de gaze stérile, quatre (4) agrafes pour pansements ou quatre (4) épingles de sûreté, un flacon de désinfectant. Sur cette trousse, une note suivante doit y être marquée : "soins d'urgence en attendant l'arrivée du médecin" et "respiration assistée bouche à bouche".

3° un dispositif antivol pour éviter la mise en panne ou le blocage d'une pièce essentielle du véhicule lorsqu'il est en stationnement pour un long moment.

Un véhicule automoteur muni d'un blindage ou d'un dispositif quelconque permettant de l'utiliser lors d'agression ou de défense ne peut circuler sur la voie publique sans autorisation spéciale du Ministre ayant le transport dans ses attributions ou son représentant. Cependant, cette condition n'est pas

mu nshingano ze cyangwa umuhagarariye. Icyakora ibi ntibikurikizwa ku binyabiziga by'Ingabo z'Igihugu.

Forces vehicles.

applicable aux véhicules des forces armées.

Birabujijwe kwongera ku mpande z'ikinyabiziga kigendeshwa na moteri cyangwa velomoteri imitako cyangwa ibindi bitari ngombwa kandi bishobora gutera ibyago abandi bagendera mu nzira nyabagendwa.

It is forbidden to add outside a motor vehicle or a moped unnecessary ornaments or accessories which can constitute a danger for other users of the public way.

Il est interdit d'ajouter à l'extérieur d'un véhicule automoteur ou d'un cyclomoteur des ornements ou des accessoires qui ne sont pas indispensables et qui sont susceptibles de constituer un danger pour les autres usagers de la voie publique.

Uretse igihe ikinyabiziga gikururwa n'ikindi, nta kinyabiziga gifite moteri gishobora kugenda mu muhanda, ahamanuka, moteri itaka cyangwa vitensi zidakora".

Except when trailed by another vehicle, no motor vehicle shall move on side roadways when its engine is off or its gears are in neutral".

Sauf s'il est pris en remorque par un autre véhicule, aucun véhicule automoteur ne peut circuler sur les chaussées en déclivité si son moteur est arrêté ou si son levier de vitesse est au point mort".

Article 2: Speed limitation for public and commercial vehicles

The Presidential Order n° 85/01 of 02/09/2002 regulating general traffic police and road traffic is complemented by Article 30 bis stated as follows:

"Article 30 *bis*: Speed limitation for public and commercial transport vehicles

Subject to provisions of Articles 29 and 30 of this Order, a public or goods transport vehicle must not exceed the speed of sixty kilometer per hour (60 km/h).

Any public or goods transport vehicle must be equipped with speed governors to control maximum road speed. The speed governors shall be specified in applicable national standards developed by the authority in charge of standards development in the Country.

A qualified agent may stop any public or goods transport vehicle for the verification of installation and proper functioning of a speed governor.

Article 2: Limitation de vitesse pour les véhicules de transports en commun et utilitaires

L'Arrêté Présidentiel n° 85/01 du 02/09/2002 portant règlement général de la police du roulage et de la circulation routière est complété par l'article 30 bis libellé comme suit:

"Article 30 *bis*: Limitation de vitesse pour les véhicules de transport en commun et de marchandise

Sous réserve des dispositions des articles 29 et 30 du présent arrêté, un véhicule de transport public ou de transport de marchandise ne doit pas dépasser une vitesse de soixante kilomètre par heure (60 km/h).

Tout véhicule de transport public ou de transport de marchandise doit être équipé du régulateur de vitesse pour pouvoir contrôler et limiter la vitesse maximale sur route. Les régulateurs de vitesse doivent être spécifiés dans les normes nationales applicables, mis en place par l'autorité chargée de l'élaboration de normes dans le pays.

Un agent qualifié peut arrêter tout véhicule de transport public ou de transport de marchandise pour la vérification de l'installation et du bon fonctionnement du régulateur de vitesse.

Muri iyi ngingo, Utugabanyamuvuduko ni utwuma cyangwa uburyo bukoreshwa mu kurinda cyangwa kubuza kurenza umuvuduko w'ikinyabiziga ntarengwa wagenwe.

For the purpose of this Article, speed Governors shall mean a device used to measure and regulate the maximum speed of a vehicle.

Aux fins du présent article, un régulateur de vitesse est un dispositif destiné à réguler ou stabiliser une vitesse maximale d'un véhicule.

Imodoka zivugwa muri iyi ngingo zifite igihe kitarenze umwaka umwe (1) uhereye igihe iri teka ritangarijwe mu igazeti ya Leta ya Repubulika y'u Rwanda kugira ngo zubahirize ibiteganywa n'iri teka".

Vehicles referred to in this Article shall have a period not exceeding one (1) year from the date of the publications of this Order in Official Gazette of the Republic of Rwanda to comply with this Order".

Les véhicules visés au présent article disposent d'un délai n'excédant pas une (1) année à partir de la publication du présent arrêté au Journal Officiel de la République du Rwanda pour se conformer aux dispositions du présent arrêté".

Ingingo ya 3: Ibyuma biyobora, uburyo bwo gusubira inyuma n'ibyangombwa by'umutekano byitwazwa ku binyabiziga

Article 3: Steering apparatus, reversing gear system and security accessories

Article 3: Dispositifs de direction, de marche arrière et accessoires de sécurité

Ingingo ya 88 y'Iteka rya Perezida n° 85/01 ryo ku wa 02/02/2002 rishyiraho amabwiriza rusange agenga imihanda n'uburyo bwo kuyigendamo ihinduwe kandi yujujwe ku buryo bukurikira :

Article 88 of the Presidential Decree n° 85/01 of 2/09/ 2002 regulating General Traffic Police and Road Traffic is modified and complemented as follows:

L'Article 88 de l'Arrêté Présidentiel n° 85/01 du 02/09/2002 portant règlement général de la police du roulage et de la circulation routière est modifié et complété comme suit:

"Buri kinyabiziga kigendeshwa na moteri kigomba kugira ibyuma biyobora bikomeye bituma umuyobozi akata ikinyabiziga cye ku buryo bworoshye, bwihuse kandi bwizewe.

"Every motor vehicle must be provided with a strong steering apparatus allowing the driver to change easily, quickly and safely the direction of his/her the motor vehicle.

"Tout véhicule automoteur doit être muni d'un appareil de direction robuste permettant au conducteur de changer facilement, rapidement et sûrement la direction de son véhicule.

Imodoka zose zigomba gufatira ibyapa mu Rwanda, zigomba kugira ibyuma biyobora ku ruhande rwazo rw'ibumoso uretse amakamyo y'ubwikorezi afite ubushobozi bwo kwikorera nibura toni makumyabiri (20), amabisi akora akazi ko gutwara abagenzi ku buryo bwambukiranya imipaka n'imashini zikoreshwa mu bwubatsi bw'imihanda **.**

All motor vehicles to be registered in Rwanda must have a steering apparatus on the left hand side except the trucks having at least twenty (20) tonnes loading capacity, buses used for cross-border public transport and road tractors.

Tous les véhicules automoteurs devant être immatriculés au Rwanda, doivent avoir les dispositifs de direction sur leur côté gauche à l'exception des camions de transport qui ont une charge minimale de vingt (20) tonnes, les bus utilisés pour le transport publique transfrontalier et les tracteurs routiers.

Icyakora, imodoka zinyura mu Rwanda cyangwa iz'abanyamahanga bagenderera Igihugu ku mpamvu zinyuranye zifite ibyuma biziyobora iburyo, zemerewe kugenda ku mihanda yo mu Gihugu mu gihe kitarenze amezi atatu (3). Iyo icyo gihe kirenze, ntizishobora kugenda zidafite uruhushya rwa Minisitiri ufite gutwara abantu n'ibintu mu nshingano ze.

However, vehicles on transit or belonging to foreigners visiting Rwanda for different purposes with steering apparatus on the right hand side shall be allowed to circulate on Rwandan roads for a period not exceeding three (3) months. When this period expires, an authorization from the Minister in charge of transport shall be required for their circulation.

Toutefois, les véhicules automoteurs en transit ou ceux des étrangers en séjour au pays pour diverses raisons qui ont des dispositifs de direction à droite, ont un délai ne dépassant pas trois (3) mois pour circuler sur les voiries du pays. Lorsque ce délai est expiré, une autorisation du Ministre ayant le transport dans ses attributions est requise pour leur circulation.

Buri modoka igomba kugira uburyo bwo gusubira inyuma bukoreshwa umuntu yicaye ku ntebe y'umuyobozi.

Every motor vehicle must be equipped with a reversing gear system which can be operated from the driving place.

Tout véhicule automobile doit être muni d'un dispositif de marche arrière manœuvrable à partir de la place du conducteur.

Ikinyabiziga cyose gifite ubushobozi bwo kurenza umuvuduko wa kilometero mirongo ine mu isaha (40 km/h) kigomba kugira icyerekana umuvuduko kiri aho umuyobozi areba kandi kigahora cyitabwaho kugira ngo kigumye gukora neza.

Any motor vehicle with the capacity of exceeding the speed of forty kilometres per hour (40 km/h) must be equipped with a speed indicator located at clear sight of the driver and be constantly in good working condition.

Tout véhicule ayant une capacité de dépasser une vitesse de quarante kilomètre par heure (40 km/h) doit être muni d'un indicateur de vitesse placé en vue du conducteur et maintenu constamment en bon état de fonctionnement.

Buri modoka yagenewe gutwara abantu, ariko umubare wabo ntarengwa ukaba munsi y'abantu batandatu (6) umuyobozi abariwemo, igomba kugira imikandara yo kurinda ibyago igenewe umuyobozi n'umugenzi wicaye ku ntebe y'imbere. Ishobora no kugira imikandara ku zindi ntebe z'inyuma.

Every motor vehicle assigned to transport people of which the maximum number of occupants is below six (6) including the driver, must be equipped with security belts for the driver and the passenger occupying the front seat of the vehicle. It can also have belts on rear seats.

Tout véhicule automobile affecté au transport de personnes dont le nombre maximum d'occupants est inférieur à six (6), le conducteur y compris, doit être doté de ceintures de sécurité destinées au conducteur et au passager occupant le siège avant du véhicule. Il peut également avoir des ceintures sur les autres sièges arrière.

Ibiranga imikandara yo kurinda ibyago bigenwa na Minisitiri ufite gutwara Abantu n'ibintu mu nshingano ze.

The characteristics of seat belts are to be determined by the Minister in charge of transport.

Les caractéristiques auxquelles doivent répondre les ceintures de sécurité sont déterminées par le Ministre ayant le transport dans ses attributions.

Buri kinyabiziga kigomba kugira ibintu bikurikira :

1° icyapa kiburira cya mpandeshatu zingana nibura na santimetero mirongo ine (40) buri ruhande, imikaba y'ibara ritukura ingana nibura na santimetero eshanu (5) z'ubugari, byaba bifite indiba ikaba igomba kuba ifite ibara rigaragara, imikaba y'ibara ritukura ibengerana cyangwa ifite umusozo ngarurarumuri. Ibyo bikoresho byose bigomba kuba bishobora guhagarikwa ku buryo bufashe.

2° Agahago k'ubutabazi karimo nibura ibipfuko bine (4) bitanduza byagenewe buri muntu, udufatisho tw'ibipfuko bine (4) cyangwa ibikwasi bine (4) bitifungura, agacupa k'umuti wo kwica mikorobi. Ako gahago kagomba kuba kanditseho ibi bikurikira: "ubutabazi bwihutirwa mu gihe hategerejwe muganga" "gufasha guhumeka umunwa ku w'uwundi".

3° ikintu kiyibuza kwibwa gituma itava aho iri cyangwa kigafunga icyuma cyayo cy'ingenzi igihe ihagaritswe igihe kirekire.

Ikinyabiziga kigendeshwa na moteri kiriho ibyuma ntamenwa cyangwa ikindi cyose gituma gikoreshwa mu gutera cyangwa kwitabara ntigishobora kugenda mu nzira nyabagendwa kidafite uruhushya rwihariye rwa Minisitiri ufite gutwara abantu n'ibintu

Every motor vehicle must have the following accessories :

1° a danger signal consisting of an equilateral triangle of at least forty centimetre (40 cm) of size, with red border of at least fifty centimetre (50 cm) of width, a clear-coloured bottom if they have one, the red borders being lightened transparently or provided with reflecting bandage All those accessories shall be able to stand in a vertical and stable position.

2° an emergency box containing at least four (4) individual bandages of sterilised gauze, four (4) site clips for bandages or four (4) safety pins, a small bottle of disinfectant. The box must be marked with the following notice: "emergency care waiting for the doctor's arrival" and "artificial breathing by mouth to mouth".

3° a burglar proof device to avoid the breaking down or damaging of an essential auto parts when the motor vehicle is in parking for a long time.

A motor vehicle equipped with armour or any other device permitting to use it in aggression or defence cannot move on the public way without a special authorisation of the Minister in charge of transport or his/her representative. However this requirement shall not be applicable to Armed

Tout véhicule automoteur doit avoir les accessoires suivants :

1° un signal de danger consistant en un triangle équilatéral d'au moins quarante centimètre (40 cm) de côté, à bords rouge d'au moins cinquante centimètre (50cm) de largeur, s'ils ont un fond, celui-ci avoir une couleur claire, les bords rouges éclairés et transparents et munis d'une bande reflétant. Tous ces accessoires doivent pouvoir être placé en position verticale stable.

2° une trousse de secours contenant au minimum quatre (4) pansements individuels de gaze stérile, quatre (4) agrafes pour pansements ou quatre (4) épingles de sûreté, un flacon de désinfectant. Sur cette trousse, une note suivante doit y être marquée : "soins d'urgence en attendant l'arrivée du médecin" et "respiration assistée bouche à bouche".

3° un dispositif antivol pour éviter la mise en panne ou le blocage d'une pièce essentielle du véhicule lorsqu'il est en stationnement pour un long moment.

Un véhicule automoteur muni d'un blindage ou d'un dispositif quelconque permettant de l'utiliser lors d'agression ou de défense ne peut circuler sur la voie publique sans autorisation spéciale du Ministre ayant le transport dans ses attributions ou son représentant. Cependant, cette condition n'est pas

mu nshingano ze cyangwa umuhagarariye. Icyakora ibi ntibikurikizwa ku binyabiziga by'Ingabo z'Igihugu.

Forces vehicles.

applicable aux véhicules des forces armées.

Birabujijwe kwongera ku mpande z'ikinyabiziga kigendeshwa na moteri cyangwa velomoteri imitako cyangwa ibindi bitari ngombwa kandi bishobora gutera ibyago abandi bagendera mu nzira nyabagendwa.

It is forbidden to add outside a motor vehicle or a moped unnecessary ornaments or accessories which can constitute a danger for other users of the public way.

Il est interdit d'ajouter à l'extérieur d'un véhicule automoteur ou d'un cyclomoteur des ornements ou des accessoires qui ne sont pas indispensables et qui sont susceptibles de constituer un danger pour les autres usagers de la voie publique.

Uretse igihe ikinyabiziga gikururwa n'ikindi, nta kinyabiziga gifite moteri gishobora kugenda mu muhanda, ahamanuka, moteri itaka cyangwa vitensi zidakora".

Except when trailed by another vehicle, no motor vehicle shall move on side roadways when its engine is off or its gears are in neutral".

Sauf s'il est pris en remorque par un autre véhicule, aucun véhicule automoteur ne peut circuler sur les chaussées en déclivité si son moteur est arrêté ou si son levier de vitesse est au point mort".

Table of contents

- Automatic table of contents

Table of Figures

- Automatic table of figures

List of Abbreviations

- Selected list of abbreviations if any in your document

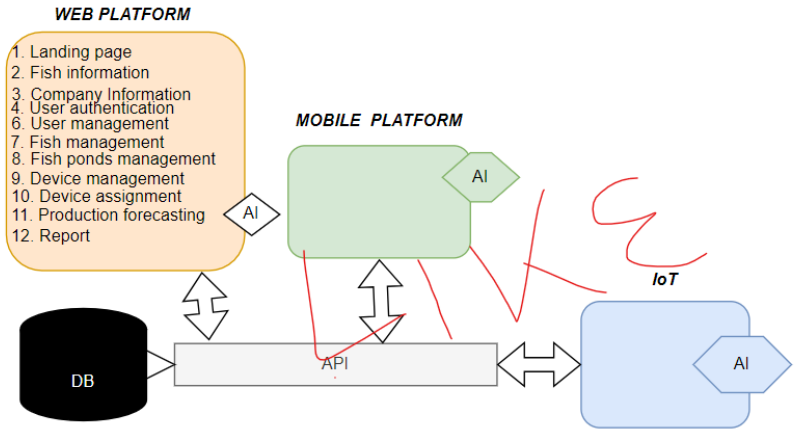

Chapter 1. Introduction

- 1.1. Historical background of the case study
- 1.2. Problem statement
- 1.3. Objectives of your project.
- 1.4. Expected Outcomes
- 1.5. Project Rationale (Importance to the community)

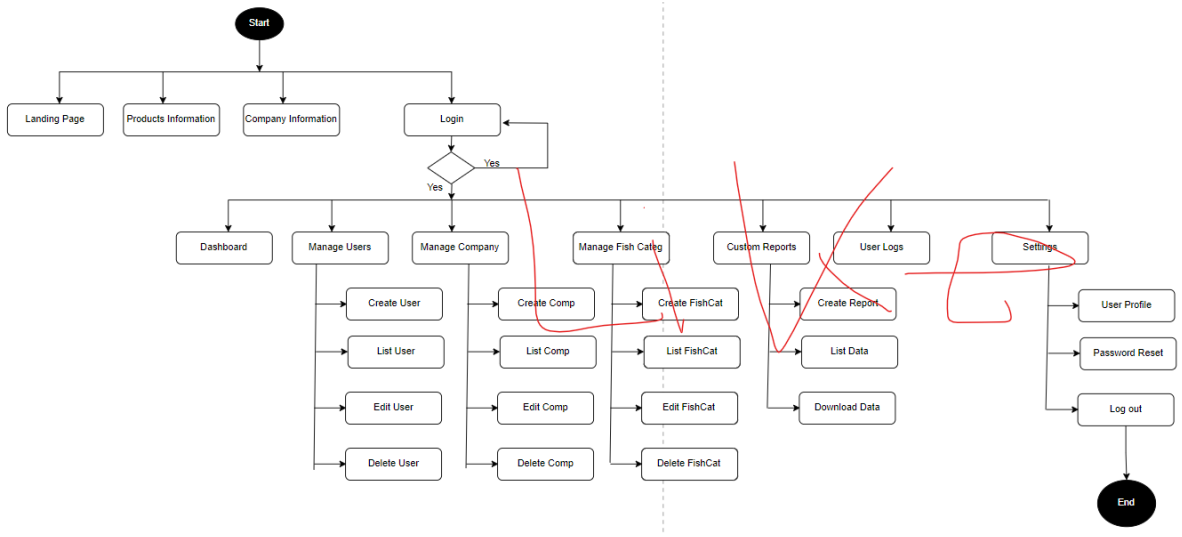

Chapter 2. System Analysis and Design

- 2.1. System Analysis
  2.1.1 Intended users of the project
  2.1.2 Intended system partners

- 2.2. System Design
  2.2.1 High-Level Architecture

2.2.2 UI design (sketch of the UI module) and Flowcharts

2.2.3 Database design with ERD and relationships

Chapter 3. Implementation

- 3.1. Introduction of the section
- 3.2 All screenshots with captions and a one-page discussion per screenshot.

E.g.: 3.2. Login page, User registration page, dashboard page, product page (list, create, update, delete).

- Generally this part is about the screenshots of your apps.

Chapter 4. Conclusion and Recommendation

- Discuss the state of the implemented system (90% of your objectives are achieved? Or 10%)
- What do you recommend?
  - ⇨ To the lecturer about technicalities?
  - ⇨ To school about Time constraints?
  - ⇨ To the partners (owners of the business you are targeting) about the app developed?
  - ⇨ To the user about training?
  - ⇨ To the beneficiaries (customers or students….) about the new technological tool?

Appendix.
