MODULE CODE & TITLE: CSC2165 Web Design (50 Marks)

SECTION: A

COMPULSORY QUESTION

Question: 1

[20 Marks]

When developing a software project or a website, you will likely be collaborating with different people who maybe in different locations. Therefore, you will need a tool that will help you to effectively carry out your task and track changes of the code without any difficulty. We normally call these tools **version controls**.

Version control, also known as source control, is the practice of tracking and managing changes to software code. Version control systems are software tools that help software teams manage changes to source code over time.

1.1 As a software engineer, which version control will you recommend your team and why?

1 Marks

1.2 Explain the process involved in creating a GitHub repository, getting it on your local computer, committing and pull some changes and collaborating with your project partner. **Note:** You should also list all Git commands involved.

[9 Marks]

1.3 Answer the following statements by True or False

[5 Marks]

- i. The MIME type for a CSS style sheet is "stylesheet = CSS"
- ii. The rel attribute specifies a relationship between the current document and another document, such as a style sheet.
- iii. A wireframe is a visualization tool for presenting proposed functions, structure and content of a web page.
- iv. URL stands for Uniform Riding Location
- v. We use
 tag to add a paragraph in the text block.

1.4 Write a media query that will format the body of webpage on a tablet/ipad whose width is between 680px and 1028px to have a **lightgreen** background and **georgian** as font family and **darkblue** as text color for h1.

[5 Marks]

SECTION: B

ANSWER ANY TWO QUESTIONS

Question: 2
