Microsoft PowerPoint

What Microsoft PowerPoint?

- PowerPoint is a **slideshow presentation**
- PowerPoint makes it easy to create, collaborate, and present your ideas in dynamic, visually compelling ways.
- Created by **Robert Gaskins** and **Dennis Austin** at a software company named **Forethought**, Inc. It was released on April 20, 1987, initially for Macintosh computers only.
- Acquired by Microsoft for \$14 million three months after it appeared.
- This was Microsoft's first significant acquisition

PowerPoint screen elements

PowerPoint screen elements

- **Title Bar:** The Title bar displays the title of the current presentation.
- **Menu Bar:** Displays the menu. You use the menu to give instructions to PowerPoint.
- **Standard and Formatting Toolbars:** They provide shortcuts to menu commands. The most commonly used toolbars are the Standard and Formatting toolbars. You use the Standard toolbar to do such things as open a file; save a file; print a file; check spelling; cut, copy, and paste; undo and redo; or insert a chart or table.

PowerPoint screen elements

- You use the Formatting toolbar to change the font, font size or font color; bold, underline, or italicize text; left align, right align, center, or justify; bullet or number lists; highlight; or decrease or increase the indent.
- **Rulers:** Vertical and horizontal guides. You use them to determine where you want to place an object. They are marked in inches.
- **Placeholders:** They hold the objects in your slide. You use placeholders to hold text, clip art, and charts.

PowerPoint screen elements

- **Status Bar:** It generally appears at the bottom the screen. The Status bar displays the number of the slide that is currently displayed, the total number of slides, and the name of the design template in use or the name of the background.
- **Outline Tab:** It displays the text contained in your presentation.
- **Slides Tab:** It displays a thumbnail of all your slides. You click the thumbnail to view the slide in the Slide pane.

PowerPoint screen elements

- **View Buttons:** They appear near the bottom of the screen. You use the view buttons to change between Normal view, Slider Sorter view, and the Slide Show.
- **Normal View:** It splits your screen into three major sections: the Outline and Slides tabs, the Slide pane, and the Task pane. The Outline and Slides tabs are on the left side of your screen. They enable you to shift between two different ways of viewing your slides. The Slides tab shows thumbnails of your slides. The Outline tab shows the text on your slides. The Slide pane is located in the center of your screen.

PowerPoint screen elements

- The Slide pane shows a large view of the slide on which you are currently working. The Task pane is located on the right side of your screen. The Tasks pane enables you to select the task you want to perform.
- **Slide Sorter View:** It enables you to view thumbnails of all your slides. In Slide Sorter view you can easily add, delete, or change the order of your slides. When you are in Slide Sorter view, a special Formatting toolbar appears. It has options that allow you to make changes to your slides

PowerPoint screen elements

- **Slide Show:** Used when you want to view your slides, as they will look in your final presentation. When in Slide Show view:

Esc	Returns you to the view you were using previously.
Left-clicking	Moves you to the next slide or animation effect. When you reach the last slide, you automatically return to your last view.
Right-clicking	Opens a pop-up menu. You can use this menu to navigate the slides, add speaker notes, select a pointer, and mark your presentation.

PowerPoint screen elements

- **Drawing toolbar:** It generally appears near the bottom of the screen. It contains tools for creating and editing graphics.
- **Common Tasks Buttons:** Used to select the type of tasks you want to perform.
- **Task Pane:** It enables you to select the specific task you want to perform.
- **Vertical Splitter Bar:** You can click and drag the vertical splitter bar to change the size of your panes.

PowerPoint screen elements

- **Minimize Button:** Used to remove a window from view. While a window is minimized, its title appears on the taskbar.
- **Maximize/Restore Button:** You use the Maximize button to cause a window to fill the screen. After you maximize a window, if you click the Restore button, the window returns to its former size.
- **Close Button:** You use the Close button to exit the window and close the program
- **Dialog Box Launch Arrow:** Tool Groups have a small arrow in the bottom right-hand corner

PowerPoint screen elements

- Clicking on this arrow will open a **Dialog Box which offers** more options and settings related to that **Tool Group**

Create a new presentation

- Select the **File tab**
- Select **New** on the left side of the window, then click **Blank Presentation**.
- A new presentation will appear.
- Or
- Press CTRL + N

To create a new presentation from a template

A template is a predesigned presentation you can use to create a new slide show quickly. Templates often include custom formatting and designs, so they can save you a lot of time and effort when starting a new project.

Create a new presentation

- Click the **File tab** then select New.
- Select a **template** to review it.
- A preview of the template will appear, along with additional information on how the template can be used.
- Click **Create** to use the selected template.
- A new presentation will appear with the selected template.

Open an existing presentation

- Select the **File tab**, then click **Open**.
- Click **Browse**.
- The **Open dialog box** will appear. Locate and select your presentation, then click **Open**.
- Or
- Press CTRL + O

To pin a presentation

- Select the File tab, then click Open. Your Recent Presentations will appear.
- Hover the mouse over the presentation you want to pin, then click the **pushpin icon**.

Open an existing presentation

- The presentation will stay in the Recent presentations list until it is unpinned.
- To unpin a presentation, click the **pushpin icon** again.

Save a presentation

- On the File tab, select Save.
- To save to your local drive, such as your laptop, a flash drive, CD or DVD drive, select Computer.
- Under Save As pick a path and file folder, name the file and Select Save.

Save your presentation file in a different file format

- On the File tab, select Save As.
- Under Recent Folders, select Browse, pick a path and file folder, and then name the file.
- In the Save as type list, pick the file format that you want and Select Save.

Add a new slide

- **Home Tab >> New Slide**

- Click on the **arrow at the bottom corner of the New Slide Tool**. You can select the layout for the new slide from the .
- Click the **Layout button**. You can select and change the slide layout.

Normal View

- When you first open a new presentation in PowerPoint the main window is in **Normal View** and **should show three frames**:
- The larger frame on the right shows the **Current Slide**.
- The left frame has two tabs:
 - o **Slides tab** - displays the slides as thumbnails
 - o **Outline tab** - displays a written outline for each slide of your presentation.
- The bottom frame is for **Notes to remind you of points for each slide**
-

Inserting and Formatting Text and Objects

Insert tab

Add text with Text Boxes

- **Home Tab >> Text Box OR**
- **Insert Tab >> Text >> Text Box**
- Click on the **Text Box button - Choose Horizontal TextBox**
- In the slide, click-and-drag the mouse to draw a TextBox
- Drag **circle corner points or square side points of the text box to change its size.**
- Click within the TextBox to type text
-

Move a Text Box

- Select a Text Box by clicking on it
- Bring the cursor over the **Border of the Text Box**
- The cursor will change to the **move icon (2 crossed arrows)**.
- Click-and-drag with the mouse to move the text box
-

Add an image from a file

- **Insert Tab >> Picture**
- Find the picture file you want to insert in the browser window
- Add an image from Clip Art
- **Insert Tab >> Clip Art**
- Search for ClipArt and other media in the right-hand search panel.
- Check in "**Everywhere**" box under "**Search in**" for more extensive results
-

Formatting Slide Design

- **Design Tab**

Change the Background

- **Design Tabs >> Background Styles**
- Click on the **Format Background button at the bottom.**
- The **Format Background dialog box will appear.**
- o You can set the color, solid or gradient, transparency or choose picture/texture fill
- o Click the **Close button to apply changes only to the current slide**
- o Click on **Apply to All to apply changes to all the slides**
-

Formatting Presentation Using the Slide Master

- The **Slide Master acts as a template for your entire presentation.**
- Altering anything on the Slide Master will change the formatting of all the slides in your presentation
- Open the Slide Master

Open the Slide Master

- **View Tab >> Slide Master**

-
- From

Editing the Slide Master

- Clicking on the **Slide Master Tab** provides a set of **Slide Master Formatting Groups**:
- o Edit Master
- o Master Layout
- o Edit Theme
- o **Background** - set the background for all the slides
- o Page Setup
- o **Close -- Click on Close button to go back to Normal View.**
- Choose the top Slide Master Slide in the left panel
- You can edit the Background, Bullet styles, Slide Titles, and Title animations here.
-

Objects and Animation

- Animation tab

Create custom animation effects for objects

- **Animation Tab >> Custom Animation**
- When you choose the **Custom Animation Tool**, the **Custom Animation panel appears on the right-hand side of the current slide.**
- Select the object to which you want to apply animation
- Click the **Add Effect button** and choose an animation style.
- o Frequently-used effects are found in "**Entrance**" styles in the menu
- Click the **Play button** to preview the animation
-

Animation effects screen

Modify Animation effects and order of animated objects

- Customize animation effects under **Modify in Custom Animation panel.**
- ○ **Start - how to start the animation**
- ○ **Direction - direction of animation**
- ○ **Speed - speed of animation**
- Change the order in which the animated objects play:
- ○ Select the object in the list under **Modify**
- ○ Hold the mouse on that item in the list and drag it up or down to change the order of objects
-

Create a Slide Transition

- Slide transitions are animation effects that appear between slides. While they look fancy, these transitions can be distracting if overused. It is often good to keep this kind of animation to a minimum.
- **Animation Tabs >> Transition to This Slide**
- Mover the cursor over the transition buttons to preview the effects.
- Click on the Transition effect button to apply the slide transition effect.
- Click on **Transition Sound button to apply sound effect for transition.**
- Click on **Transition Speed button to adjust the speed.**
- Click on **Apply to All to apply the same transition effect to all the slides.**
-

Change the order of the slides

- **View Tab >> Slide Sorter**
- o This view is used to change the order, if you have a lot of slides.
- Or, select **Slides tab in the left frame in the Normal View. You can see thumbnails of the slides in your presentation.**
- o Click on a slide thumbnail and drag up and down to change the order
-

Present the Slide Show

- **View Tab >> Slide Show**
- To move to the next slide in your presentation do one of the following:
 - Click the left mouse button
 - Hit the spacebar
 - Use the arrow keys on the keyboard. Up and left go back, right and down go forward.
 - Click on the Esc key on keyboard to go back to **Normal view**.
 -
